

PUBLIC TRANSPARENCY REPORT

2023

Russell Investments

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Responsible investing is at the heart of our investment beliefs. As a global investment solutions provider, we believe that investing responsibly can help to deliver attractive investment returns and meet client objectives in the long term. To this end, we execute an integrated responsible investing practice across the firm. This practice is founded on the following set of four core beliefs, codified in 2015:

- ESG factors impact security prices
- A deep understanding of how ESG factors impact security prices is value-adding to a skilful investment process
- Active ownership is an effective tool for improving investment outcomes
- Embedding ESG considerations into a firm's culture and process improves the likelihood of prolonged and successful investing

Drawing on the core responsible investing beliefs outlined above, Russell Investments has developed formal policies on responsible investing, climate change risk and sustainability risks.

These policies are the foundation of our efforts to efficiently integrate ESG considerations into our investment manager evaluation process, our portfolio management, our advisory services, and when implementing proprietary solutions as desired by clients.

These policies are regularly reviewed to evolve in accordance with market best practice. Further information regarding how we integrate stewardship and investments can be found in our Investment Stewardship Report.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

At Russell Investments, we apply multi-faceted approach, where sustainability is assessment holistically as opposed to giving one factor priority over another. Our approach has evolved to encompass enhanced ESG solutions, climate risk management, and stewardship with a persistent focus on creating a framework built for client-led solutions.

Solutions

We are most proud of our innovative solutions, which include Article 8-designated products under the EU's Sustainable Finance Disclosure Regulation (SFDR), listed and unlisted infrastructure ESG strategies, sustainable model strategies launched in Australia, and bespoke ESG client mandates.

These exemplify our commitment to a client-focused approach and our ability to tailor portfolios that align with investor goals, circumstances, and preferences, ensuring superior investment outcomes. Some additional milestones and highlights achieved during 2022 are listed below:

- £29bn global assets in ESG approach
- 12 flagship EMEA strategies across equities and fixed income evolved to "Light Green / Article 8" status under SFDR with over \$6B in AUM
- Both listed and unlisted infrastructure ESG strategy launches
- Sustainable model strategies launched in Australia
- A number of individual client mandates evolved to include bespoke ESG requirements

Active Ownership

In 2022, we materially increased both the number and quality of our engagements and collaborations in pursuit of engagement outcomes.

We also successfully launched an internal information sharing platform that connects our sustainable risk practices with our manager oversight and active ownership efforts. Going forward, we look to deepen our collaborative engagement relationships with investor groups and our sub-adviser partners.

- 9,949 meetings and 101,293 proposals voted in 2022
- 13% votes against management
- 6% votes against proxy advisor
- 365 proposals referred to the Active Ownership committee for a vote in 2022
- 411 engagements with 189 issuers
- Environmental – 45% Social- 19% Governance – 25%

Stewardship

During 2022, in response to rising requirements across our business, we took action to increase the resources and senior management focused on responsible investing.

We believe that these enhancements demonstrate our firm-wide commitment to responsible investing and will strengthen our ability to meet client-led requirements in this area. We actively collaborate in initiatives with industry participants, regulatory working group and other stakeholders to collectively deliver a well-functioning financial system

- 25% increase in the number of associates dedicated to advancing our ESG efforts
- Participation in 5 industry-wide consultations in 2022
- TCFD enabled data, tools and capabilities to produce TCFD aligned reporting
- Up to 20 hours of on-demand training on specific ESG matters for associates

Net zero interim targets

In 2021, Russell Investments signed up to the Net Zero Asset Manager Commitment initiative (NZAMi) to support the goal of net zero GHG emissions by 2050.

As part of this commitment, we work in partnership with interested clients to develop a roadmap for portfolio alignment. The firm's overarching interim goal is to manage 25% of its global AUM in line with net zero standards by 2030. Further information has been provided on the Sustainability Outcomes module of this submission.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We have taken steps to advance our commitment to responsible investing in the following areas and expect this evolution to continue over the next couple of years:

Climate risk management

We are committed to working in collaboration with other leading industry participants to formulate best practice principles and frameworks. Our enhancements over the next year will include leveraging our partnership with a specialist climate risk provider, integration of additional climate risk metrics into our investment practices, and further collaboration with industry peers. We will continue to provide training to our associates to build familiarity with new and complex systems.

Similarly, we recognise that asset-owner clients are eager for more education on climate risk. Looking forward, we will continue to provide outreach and consulting services to help our clients move up the learning curve.

ESG Integration

We have put meaningful resources into improving the data and analytics available to our portfolio managers who seek monitor and manage ESG risks. Among our achievements: streamlining the transmission of ideas and information from portfolio management to active ownership and using improved data and scenarios on climate risk to enhance our asset allocation capabilities.

We expect the use of data and the development of analytical tools to continue in 2023.

Our work to strengthen responsible investing practices in fixed income, real assets, private markets, and alternatives also remains a priority. In these non-equity asset classes, while we await standardisation of reporting, our initial due diligence and monitoring compensate for absent and inconsistent data, and across all asset classes our methods of constructing multi-manager ESG portfolios will continue to adapt to client needs and regulatory expectations.

Active ownership

In 2022, we materially increased both the number and quality of our engagements and collaborations in pursuit of engagement outcomes.

We also successfully launched an internal information sharing platform that connects our sustainable risk practices with our manager oversight and active ownership efforts. Going forward, we look to deepen our collaborative engagement relationships with investor groups and our sub-adviser partners. We expect that increased internal and external communication will further the success of our engagement objectives, including those which support our clients' net zero goals. We have begun tracking the outcomes targeted by our engagement work, and we will evolve our reporting to highlight this progress.

Transparency and reporting

The improvement of portfolio viewing capabilities and data quality continues to be a critical area of development from a stewardship perspective.

Our Enterprise Risk Management System ('ERMS') risk engine is now in use across all our portfolios, enabling total solution analysis for clients, supporting crosscutting multi-lens risk analysis which encompasses multi-asset combinations. We will continue to enhance this dataset and analytic competence to improve client reporting across the board including, but not limited to, ESG metrics and objectives. While ESG data and metrics have improved considerably in recent years, we believe that gaps still exist. Continued enhancements will contribute to helping clients further understand our stewardship efforts, as well as the risks and opportunities within their mandates.

Solutions

Similarly, evolving and developing new investment solutions is fundamental to addressing our clients' ESG needs. We leverage innovation and industry leading insight to set total portfolio-level direction that aligns to targeted outcomes.

We will continue to monitor the rapidly changing regulatory environment in the EU and beyond, providing choice for clients through both "light" and "dark" green sustainable solutions.

This will be supported through expanding our list of recommended ESG products within our sustainable research universe, advancing our market-leading overlay capabilities, and moving beyond carbon-focused metrics to include forward-looking sustainability projections. Increasing our ability to customise and deliver tailored ESG outcomes for clients remains a critical objective, and our global solutions platform is being built with that in mind.

Training and development

Russell Investments has provided training and development on ESG matters to both our clients and internal associates.

We have made ESG training available to our clients through webinars, conferences, and whitepapers, enabling them to understand the significance of ESG factors in investment decisions. We have also greatly enhanced the internal training provided to our associates. We have developed a comprehensive ESG curriculum that covers foundational ESG principles, analysis, and integration into investment processes.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Kate El-Hillow

Position

President, Chief Investment Officer

Organisation's Name

Russell Investments

A

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

PGS 4	PLUS	PGS 1	N/A	PUBLIC	Responsible investment policy elements	1 – 6

Does your formal responsible investment policy(ies) identify a link between your responsible investment activities and your fiduciary duties or equivalent obligations?

(A) Yes

Elaborate:

As a global investment solutions provider, we firmly believe that the inclusion of ESG factors can provide investors with valuable insights into the long-term sustainability and profitability of companies. We recognize that responsible investing not only helps deliver attractive investment returns but also aligns with our clients' objectives.

Our Responsible Investing Policy is as follows:

"Russell Investments' policy is to integrate responsible investing throughout our investment manager evaluation process, portfolio management, advisory services, and when implementing proprietary solutions as desired by clients.

Responsible investment entails considering environmental, social and governance (ESG) issues when making investment decisions and leveraging active ownership to more effectively manage risk and generate sustainable, long-term returns. Our approach in all cases is guided by our fiduciary duty."

At our firm, we view sustainable investing as intelligent investing, and we have built our responsible investing practice on our four core beliefs, as described in our Investment Stewardship Report:

- ESG factors impact security prices
- A deep understanding of how ESG factors impact security prices is value-adding to a skillful investment process
- Active ownership is an effective tool for improving investment outcomes
- Embedding ESG considerations into a firm's culture and process improves the likelihood of prolonged and successful investing

Our professionals possess a deep understanding of how sustainability issues impact the financial performance of various investments across asset classes, and their aim is to identify and act on material financial risks and opportunities.

We believe that companies with robust ESG practices are more likely to mitigate governance and environmental risks, enhance their brand reputation, attract top talent, and maintain stronger stakeholder relationships, all of which contribute to their long-term financial resilience.

o

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 11.2	CORE	N/A	N/A	PUBLIC	Roles and responsibilities	1 – 6

Does your organisation have governance processes or structures to ensure that your overall political engagement is aligned with your commitment to the principles of PRI, including any political engagement conducted by third parties on your behalf?

● (A) Yes

Describe how you do this:

The Investment Division (ID) is responsible for undertaking all investment activities for clients. The ID is governed by the Investment Strategy Committee (ISC), which is authorized by the Executive Committee (EC) to oversee investment activities, review investment performance, and establish investment policy and strategy. The ISC is responsible for processes and standards of stewardship practice, with a focus on active ownership and creating long-term value through appropriate decision making around allocations and risk management. As regulatory standards and industry practices evolve, the ISC seeks to continually update investment processes, including stewardship practices.

The ISC's members comprise the Global Chief Investment Officer, who serves as the Chairperson, and senior ID and risk professionals.

The ISC delegates to numerous sub-committees to review and recommend proposals to create new investment products, launch new funds and hire/terminate investment managers.

Within the ID, our Active Ownership Committee manages a globally consistent and rigorous approach to proxy voting and engagement activities. The Active Ownership Team oversees our proxy voting policies, procedures, guidelines and voting decisions, whilst continuing to develop our processes to meet evolving client needs and expectations. The Active Ownership Committee is made up of tenured and experienced Russell Investments professionals from a variety of roles, including portfolio management, manager research and investment strategy.

All proxy voting and engagement activities are advised by a member of Russell Investments' legal team.

When an opportunity is identified from a political engagement perspective, the Active Ownership Committee is required to seek approval from the ISC. We have legal and compliance representation across our governance bodies ensure compliance with regulatory and legal standards

Russell Investments' Board of Directors has ultimate responsibility for the strategic priority, corporate governance, and long-term stewardship of the firm.

o (B) No

o (C) Not applicable, our organisation does not conduct any form of political engagement directly or through any third parties

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 12	CORE	N/A	N/A	PUBLIC	Roles and responsibilities	1

In your organisation, which internal or external roles are responsible for implementing your approach to responsible investment?

(A) Internal role(s)

Specify:

The Investment Division is governed by the Investment Strategy Committee (ISC), which is authorized by the EC to oversee investment activities, review investment performance, and establish investment policy and strategy - The ISC is responsible for processes and standards of stewardship practice, with a focus on active ownership and creating long-term value through appropriate decision making around allocations and risk management.

(B) External investment managers, service providers, or other external partners or suppliers

Specify:

Russell Investments' portfolio managers select active managers from among those ranked highly by our manager research teams. The Investment Strategy Committee confirm that sub-advisers selected by portfolio managers have sufficient and appropriate ESG capabilities as needed for each client solution
Analysts leverage both quantitative and qualitative information in conducting each review, drawing on external data and research from providers including Sustainalytics and MSCI.

- (C) We do not have any internal or external roles with responsibility for implementing responsible investment

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 13	CORE	PGS 11	N/A	PUBLIC	Roles and responsibilities	1

Does your organisation use responsible investment KPIs to evaluate the performance of your board members, trustees, or equivalent?

- (A) Yes, we use responsible investment KPIs to evaluate the performance of our board members, trustees, or equivalent
- (B) No, we do not use responsible investment KPIs to evaluate the performance of our board members, trustees, or equivalent**

Explain why: (Voluntary)

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 14	CORE	PGS 11	N/A	PUBLIC	Roles and responsibilities	1

Does your organisation use responsible investment KPIs to evaluate the performance of your senior executive-level staff (or equivalent), and are these KPIs linked to compensation?

● (A) Yes, we use responsible investment KPIs to evaluate the performance of our senior executive-level staff (or equivalent)

Indicate whether these responsible investment KPIs are linked to compensation

- **(1) KPIs are linked to compensation**
- (2) KPIs are not linked to compensation as these roles do not have variable compensation
- (3) KPIs are not linked to compensation even though these roles have variable compensation

Describe: (Voluntary)

As a global organization, we have made the consideration of ESG and effective stewardship across all investment decisions a key objective. Senior portfolio managers are compensated based upon a combination of factors which encompass their success in delivering desired investment outcomes to clients, while effectively contributing to investment processes and providing suitable levels of stewardship of client assets. Within that overarching evaluation framework, portfolio managers are required to consider ESG factors and stewardship in evaluating and selecting sub-advisers, as well as evaluating ESG risks and exposures at the total portfolio level and pursuing engagement opportunities. Portfolio managers' effective incorporation of these factors is explicitly measured, included in annual assessments, and linked to compensation.

In addition to senior portfolio managers, all associates with specific responsibilities for ESG, stewardship and climate change have annual performance goals aligned with the success of the integration of these topics. These goals include evolving our responsible investing and stewardship practices to be in line with global standards; collaborating with leading industry bodies to advance industry frameworks; driving our engagement practices; and research and development. All these items are aimed at delivering robust stewardship practices to meet our clients' objectives. Success in meeting these specific stewardship and ESG-related performance goals is linked to remuneration.

- (B) No, we do not use responsible investment KPIs to evaluate the performance of our senior executive-level staff (or equivalent)

EXTERNAL REPORTING AND DISCLOSURES

- (C) Exclusions based on minimum standards of business practice aligned with international norms such as the OECD Guidelines for Multinational Enterprises, the International Bill of Human Rights, UN Security Council sanctions or the UN Global Compact
- (D) Exclusions based on our organisation's climate change commitments
- (E) Other elements

Specify:

In our global exclusion policy, we have identified five broad types of exclusions that may be applied to our investment solutions :

- a) Exclusions for ESG-oriented solutions
 - b) Client-, market-, or style- exclusions
 - c) Regulatory exclusions
 - d) Engagement-based exclusions
 - e) Exclusions based on exceptional market circumstances
- (F) Not applicable; our organisation does not have any organisation-level exclusions

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 21	CORE	N/A	N/A	PUBLIC	Capital allocation	1

How does your responsible investment approach influence your strategic asset allocation process?

(A) We incorporate ESG factors into our assessment of expected asset class risks and returns

Select from dropdown list:

- (1) for all of our AUM subject to strategic asset allocation
- (2) for a majority of our AUM subject to strategic asset allocation
- (3) for a minority of our AUM subject to strategic asset allocation**

(B) We incorporate climate change–related risks and opportunities into our assessment of expected asset class risks and returns

Select from dropdown list:

- (1) for all of our AUM subject to strategic asset allocation
- (2) for a majority of our AUM subject to strategic asset allocation
- (3) for a minority of our AUM subject to strategic asset allocation**

(C) We incorporate human rights–related risks and opportunities into our assessment of expected asset class risks and returns

(D) We incorporate risks and opportunities related to other systematic sustainability issues into our assessment of expected asset class risks and returns

Select from dropdown list:

- (1) for all of our AUM subject to strategic asset allocation
- (2) for a majority of our AUM subject to strategic asset allocation
- (3) for a minority of our AUM subject to strategic asset allocation**

Specify: (Voluntary)

On an annual basis, Russell Investments updates its Enterprise Risk Assessment, which includes a list of market-wide and systemic risks identified by Russell Investments' Global Risk Management Team. Each identified event is given a rating across two dimensions namely likelihood and severity. As of year-end 2022, the risks with the largest combined scores were:

- Illiquidity Risk
- Policy Exhaustion
- Pandemic
- Factor crowding investing
- Trade-and currency wars
- Technological advances
- Cold War 2.0
- Correlation shock
- Climate risk including transition risk and physical risk

Once risks/events are identified, steps are taken to evaluate whether these risks should be monitored and/or mitigated.

Where required, this may include recommending new risk monitoring procedures or changes in portfolios to track or address the potential impact of the risk.

Russell Investments has partnered with an external specialist climate risk provider to enhance our climate modelling toolkit.

We will continue to produce baseline CMAs that use historical long-run economic and financial data (referred to as "climate-agnostic CMAs"), and then "shocking" the CMAs based on different climate scenarios and their potential economic and financial impact (referred to as "climate-adjusted CMAs"). This enables us to compare the potential portfolio impact of different climate scenarios across asset classes and exposures. We have used our climate-adjusted CMAs to support clients who want to further understand the impact of various climate scenarios on their asset allocation decision.

- (E) We do not incorporate ESG factors, climate change, human rights or other systematic sustainability issues into our assessment of expected asset class risks and returns
- (F) Not applicable; we do not have a strategic asset allocation process

(B) Maximise our individual investments' risk-adjusted returns. In doing so, we do not seek to address any risks to overall portfolio performance caused by individual investees' contribution to systematic sustainability issues.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 23	PLUS	OO 5, OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

The exercise of active ownership is an important part of our investment responsibilities and decision-making process. As part of our stewardship activities, we aim to engage with companies on overall business strategy, capital allocation and ESG practices, while encouraging appropriate levels of risk mitigation. Through our engagement activities, we aim to promote changes by encouraging good practices on material issues that may protect and enhance long-term sustainable value creation and shareholder rights, and ultimately benefit our clients as the beneficiaries of our investments. Furthermore, through ongoing dialogue, we can better understand both the risk factors and potential return associated with the ownership of a company.

Our business model and service capabilities enable a multi-channel approach to stewardship, meaning that we engage directly with issuers, engage through and with our sub-adviser partners, and join collaborative engagement efforts with third-party market participants. Further information can be found in our Engagement Policy document.

At Russell Investments, we hold thousands of securities on behalf of our clients. Our engagements are conducted to ensure broad consideration and consistent application of our processes across geographies, sectors and market cap. However, given the breadth of our investment operations and clients' interests, we leverage data and research to focus our efforts on the highest return or risk mitigation opportunities.

Russell Investments considers the following criteria when selecting targets for engagement:

- Russell Investments' ownership stake, as percent of shares outstanding and/or weight of fund exposure;
- Proxy voting history and management responsiveness to shareholder concerns;
- ESG analysis performed in-house and by third-party vendors of ESG metrics focusing on sub-industry peer comparison and ESG-related controversies;
- Research and analysis from Glass Lewis, our proxy voting administrator;
- Any history of previous engagement activity; and
- Opportunities highlighted by our sub-advisers.

Engagement targets are finalized using the input and insights of our portfolio management teams and approved by Russell Investments' Investment Strategy Committee.

Which of the following best describes your organisation's default position, or the position of the external service providers or external managers acting on your behalf, concerning collaborative stewardship efforts?

● (A) We recognise the value of collective action, and as a result, we prioritise collaborative stewardship efforts wherever possible

- (B) We collaborate on a case-by-case basis
- (C) Other
- (D) We do not join collaborative stewardship efforts

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 24.1	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

Elaborate on your organisation’s default position on collaborative stewardship, or the position of the external service providers or external investment managers acting on your behalf, including any other details on your overall approach to collaboration.

As a leading investment solutions partner with multi-asset and multi-manager capabilities, we leverage a broad set of relationships to exert influence and enable multiple levels of engagement. These relationships extend across and through our sub-advisers, standards setters, proxy and engagement service providers, other market participants and, of course, corporate issuers. These connections also provide information sharing and serve as an important feedback loop into our active ownership processes

We consider our sub-adviser relationships to be a strategically important element of our stewardship program. As a manager-of-managers, we hire sub-advisers to play targeted, value-enhancing roles in our portfolios. We leverage these relationships to provide an informed and integrated approach to active ownership. Day-to-day they are routinely in close contact with our investee companies, so it is natural that their insights and recommendations regularly contribute to our engagement and voting priorities and decisions.

Regular discussions between our portfolio managers and our sub-advisers can validate the benefit of an engagement and inform our approach. Through consultation with our sub-adviser partners, we determine whether joint outreach or separate but aligned efforts are more likely to be effective. Opportunities highlighted by our sub-advisers might reinforce engagement efforts that are already underway or prompt new, partnered engagement efforts with sub-adviser input and participation.

Since early 2020, Russell Investments has also leveraged a partnership with Sustainalytics for thematic and collaborative engagements. Sustainalytics’ engagement programs enable participants to build relationships with a selected set of issuers to encourage action on specific issues in ways that promote long-term value. Russell Investments has selected themes that align with our engagement focus areas, as outlined in our Investment Stewardship Report, in areas where Sustainalytics’ expertise and access increases the likelihood of success. Across all five themes selected, our investment professionals participate directly in calls with the targeted companies.

Russell Investments’ collaboration with Sustainalytics has materially broadened our scope of engagements. Sustainalytics thematic engagement programs are designed to run a three-year timeline with the purpose of influencing companies to proactively manage specific ESG risks and opportunities.

We actively collaborate in initiatives with industry participants, regulatory working groups, and other stakeholders to collectively deliver a well-functioning financial system. For example, as members of the Climate Action 100+ initiative since early 2020, and in line with our Net Zero commitment, Russell Investments has engaged with a selected number of companies on climate transition to support the initiative’s goal. To this end, during 2022 we have actively contributed to the working group in the respect of the companies we engage with.

PGS 26	PLUS	OO 8, OO 9, PGS 1	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How does your organisation ensure that its policy on stewardship is implemented by the external service providers to which you have delegated stewardship activities?

- (A) Example(s) of measures taken when selecting external service providers:

As a global organization, Russell Investments has longstanding experience of integrating with various internationally recognized outsourcing vendors and partners, alongside our internal resources, to improve the overall efficiency of our core services for clients. We engage with providers across our operational, information technology and financial service lines, for some of our middle and back-office support services. We maintain continuous oversight of our providers via service level agreements, formal relationship meetings and evaluations that incorporate performance metrics.

Russell Investments' vendor risk management framework utilizes a combination of decentralized vendor management, centralized risk management, and focused sourcing and procurement. Key components to managing vendors include business unit ownership of vendor activities, sourcing and procurement assistance, and risk management oversight.

☑ (B) Example(s) of measures taken when designing engagement mandates and/or consultancy agreements for external service providers:

In 2022, following a review of systems that would allow us to analyze vendor spend data alongside metrics on diversity, our Global Sourcing and Procurement team implemented a product from Supplier.io, called Supplier Explorer. The tool identifies supplier diversity metrics within our existing spend data and allows us to search for other diverse suppliers as well. The tool has helped establish a baseline for reporting and transparency. We have also become a member of the Financial Services Roundtable for Supplier Diversity. This membership will allow us to obtain benchmarking and learn best practices that are specific to our industry. We continue to evaluate additional memberships with groups that certify, develop, and connect Minority Business Enterprises (MBEs) with major corporations and public agencies.

☑ (C) Example(s) of measures taken when monitoring the stewardship activities of external service providers:

To ensure our process of delivering effective stewardship is of high standard, we regularly monitor and review the services of both Glass Lewis' and Sustainalytics'.

For proxy voting, an annual service review is conducted to include statistics of the previous year's vote activity and accuracy and timeliness from the Glass Lewis research team. Russell Investments tracks these statistics year-on-year to ensure consistent quality of service.

Members of the Active Ownership Committee also hold an annual meeting with Glass Lewis, addressing any concerns or updates regarding the services they provide.

Russell Investments has partnered with Sustainalytics as an engagement service provider because their model allows for close oversight and integration with our internal active ownership and investment processes. Our Active Ownership Team, under the oversight of the Active Ownership Committee, is responsible for the selection and monitoring of engagement themes. The team communicates regularly with Sustainalytics on the positioning of these themes, target company selection and on progress and outcomes. Additionally, portfolio managers and wider members of the ID regularly participate in direct company engagements led by Sustainalytics.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 27	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How are your organisation's stewardship activities linked to your investment decision making, and vice versa?

As a function of our integrated approach, members of the investment division are trained to integrate ESG considerations and stewardship into our standard investment practice at all stages of our investment process where relevant to the service or asset class. Subject matter experts are embedded within our research, risk, analytics, quantitative and portfolio management teams, and work in close coordination with dedicated active ownership personnel. Our professionals understand the ways in which sustainability issues manifest in the financial performance of various investments across asset classes, and their aim is to identify and act on material, financial risks and opportunities.

Below, we describe how our responsible investing beliefs and policies translate into practice within our key investment capabilities.

Portfolio Management Process

Responsible investing is integrated throughout key elements of our investment process, including our manager research, portfolio management and portfolio construction activities. We believe that ESG considerations should sit alongside traditional assessments as a part of the overall strategy evaluation. Since 2014, our manager research analysts have evaluated how effectively investment managers incorporate ESG considerations into their investment process as a standard component of our diligence across all asset classes.

Analysts leverage both quantitative and qualitative information in conducting each review, drawing on external data and research from providers including Sustainalytics and MSCI.

Portfolio managers manage sustainability risks in our investment solutions through our quarterly and annual manager review process and through implementing proprietary solutions. Through a process we call 'Enhanced Oversight' (EO), portfolio management teams assess sustainability risks in funds and explain how those risks are being monitored and managed. Insights gathered in the EO process frequently inform our active ownership priorities and actions, and portfolio managers are regular engagement participants.

–

Insight and Research

We tailor our research to evolve our understanding of sustainability risks and opportunities, and this is reflected in our strategy development, metrics, and reporting. The research agenda is tailored to address challenges faced by clients as well as an ongoing commitment to enhance our proprietary ESG strategies.

For example, we refined off-the-shelf ESG scores built for a wide range of uses, to focus on financially material ESG issues for use in our proprietary ESG strategy. While managing low carbon strategies, we found that several unintended consequences such as reduced exposure to renewable energy and overall increase in ESG-related risk were prevalent among simplistic approaches to carbon reduction, so we researched and implemented enhancements that better aligned with our clients' objectives including the introduction of a green energy ratio. As our clients faced regulatory pressure to introduce climate scenario analysis, we performed detailed due diligence on a dozen climate risk model providers, and onboarded our preferred provider to enable clients across our platform to meet this emerging obligation.

–

Active Ownership

As part of our stewardship activities, we aim to engage with companies on overall business strategy, capital allocation, and environmental, social and governance practices while encouraging appropriate levels of risk mitigation in line with our engagement policy.

In addition, we promote transparency to support informed decision making and well-functioning financial markets by engaging specifically on ESG disclosures. While a number of criteria guide our selection of engagement opportunities, our evaluation of a company's sustainable risks is couched in its industry context, through the use of peer-relative metrics and qualitative comparisons. Members of the Active Ownership team work closely with portfolio managers during the Enhanced Oversight process to ensure effective integration of insights.

STEWARDSHIP: (PROXY) VOTING

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 29	CORE	OO 9, PGS 1	N/A	PUBLIC	Stewardship: (Proxy) voting	2

When you use external service providers to give recommendations, how do you ensure those recommendations are consistent with your organisation's (proxy) voting policy?

(A) Before voting is executed, we review external service providers' voting recommendations for controversial and high-profile votes

Select from the below list:

- (1) in all cases**
- (2) in a majority of cases
- (3) in a minority of cases

(B) Before voting is executed, we review external service providers' voting recommendations where the application of our voting policy is unclear

Select from the below list:

- (1) in all cases**
- (2) in a majority of cases
- (3) in a minority of cases
- (D) We do not review external service providers' voting recommendations
- (E) Not applicable; we do not use external service providers to give voting recommendations

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 30	CORE	OO 9	N/A	PUBLIC	Stewardship: (Proxy) voting	2

How is voting addressed in your securities lending programme?

- (A) We recall all securities for voting on all ballot items
- (B) When a vote is deemed important according to pre-established criteria (e.g. high stake in the company), we recall all our securities for voting**

Provide details on these criteria:

Our policy on securities lending, as it applies to proxy voting, ensures that we exercise voting rights on behalf of our clients. Glass Lewis, our proxy administrator, currently produces a weekly report of shares with upcoming proxy votes that meet pre-determined criteria for potential restriction and/or recall. Russell Investments' policy requires a restrict/recall action for issuers that are either (1) undergoing M&A activity, or (2) issuers for which Russell Investments holds >2% of overall shares outstanding. Additionally, the Active Ownership Committee has discretion to restrict securities on a case-by-case basis. We restrict these securities (either 15 business days out from the record date, or as soon as we are notified, whichever comes first) from being loaned before their record date, recalling any loans as necessary. The restriction is lifted one business day after the record date.

- (C) Other
- (D) We do not recall our securities for voting purposes
- (E) Not applicable; we do not have a securities lending programme

STEWARDSHIP: EXAMPLES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 40	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Examples	2

Provide examples of stewardship activities that you conducted individually or collaboratively during the reporting year that contributed to desired changes in the investees, policy makers or other entities with which you interacted.

(A) Example 1:

Title of stewardship activity:

Leading a Climate Action 100+ Engagement

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

In 2021, Russell Investments joined the collaborative engagement via CA100+ as a Lead Investor for a UK-based Oil and Gas Distribution Company which is classified as a top 100 emitter, i.e., one of the 100 largest emitting companies globally. As co-lead of the engagement, we have had regular dialogue with the company as it considered how to improve their approach to climate change. Moreover, we sought updates on the company's public policy activities and lobbying alignment disclosure.

Outcome

We have found the company to be very constructive and open to engagement on climate change risk. The alignment of the climate transition plan to 1.5 degrees C is challenging to assess due to the different activities of the business and the varying decarbonization trajectories of these activities under decarbonization scenarios. Russell Investments will continue to work with the company via the CA100+ initiative and collaborative engagement process.

(B) Example 2:

Title of stewardship activity:

Private Equity Secondaries Manager Engagement

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

Our sub-adviser manager was seeking Limited Partner Advisory Committee approval to replace one Key Executive with another within the Fund's Limited Partnership Agreement. The Key Executive had departed recently due to personal reasons.

Outcome

As a Limited Partner Advisory Committee (LPAC) member, we were asked to review this proposal. We discussed with the manager the key skills and experience of the new executive to determine whether they were to a comparable level of the departing Key Executive, to ensure strong management and stable return prospects. As the caliber of the new incoming Key Executive was to a comparable quality we voted in favor of this proposal, and they were subsequently appointed.

(C) Example 3:

Title of stewardship activity:

Improving Human Capital Management Reporting

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) **Social factors**
- (3) Governance factors

(3) Asset class(es)

- (1) **Listed equity**
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

Russell Investments engaged with a ride sharing company with the aim to improve the company's reporting and available data around its human capital management policies and practices. While the public reporting supplied by the company included key human capital metrics, the data was several years out of date with no indication of being updated.

The company has faced several human capital related controversies in previous years which has increased demand by shareholders for a constructive response and transparency including data measurement, target setting, and policy implementation.

Outcome

During engagement, the company committed to publish updated human capital metrics in reporting later in the year. The company was unable to confirm whether the data to be published would be in line with peers both in scope and in time span.

After reviewing the new disclosures, we noticed that whilst the details of information provided has improved, we were not fully satisfied with the level of transparency provided by the company. Russell Investments therefore considers this engagement ongoing as the company works to further strengthen its human capital management disclosures to align with peers and provide shareholders the requested transparency to assess risks.

(D) Example 4:

Title of stewardship activity:

Improving robustness on Executive compensation practices and disclosures

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) **Led by an external investment manager, real assets third-party operator and/or external property manager**

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) **Governance factors**

(3) Asset class(es)

- (1) **Listed equity**
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

Russell Investments, in partnership with a sub-adviser, conducted two joint engagements with the Chair of the Nomination and Compensation committee of a Luxembourg-based Laboratory Equipment and Services company. The purpose was to discuss Russell Investment's vote against management on the remuneration proposal during the 2021 Annual General Meeting. The main objective was to encourage the company to improve disclosures on executive compensation as well as strengthen the design of the remuneration package.

Outcome

During our conversations we have found that the company has been proactively evolving their executive compensation package based on ESG rating agencies and proxy adviser research.

The company was open to review the concerns raised during the call, and they have committed to improve in several areas:

- Structure
- Transparency
- Performance compensation structure.

We will follow up with the company in 2023 to confirm whether improvements outlined above are aligned with our expectations and international good governance practices and disclosures.

(E) Example 5:

Title of stewardship activity:

Ensuring appropriate governance structures are in place

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

Russell Investments engaged a United Kingdom-based independent oil and gas exploration and production company to ensure that the appropriate governance structure is in place to weather operational and financial challenges.

The company has gone through a significant refinancing process after its external auditor flagged a material uncertainty regarding the company's ability to continue as a going concern in 2020 accounts. During the last few years, the company has also changed their leadership significantly – including the Chief Executive Officer, Chair and Chief Financial Officer roles.

Outcome

Overall, we are satisfied with the explanation provided by the company on the refinancing process and the recruitment processes for the Chair and Chief Financial Officer.

The company showed a strong board evaluation process and the key skills required for the candidate pool are clearly defined.

Whilst we do not retain significant concern from a governance perspective, the engagement remains open. We will follow up our conversations with the company during 2023 with a particular focus on the development of a strategy to eliminate flaring activities and improve biodiversity disclosure.

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

(A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

The first step in managing climate-related risks in investments is identifying them. There are many mechanisms through which climate-related factors impact security prices and these risks can be broadly categorised as transition or physical risks. We recognise that different risks are likely to manifest over different time horizons and that they require different tools to assess, as outlined below (refer to our public TCFD report on our website for a full “Snapshot of Climate Risk Identification and Assessment Process” Figure).

Transition Risk Opportunities: Risks arising from shift to low carbon economy.

Relevant time horizon: medium-term

- Changes in cost: Price on carbon, costs of abatement. Relevant time horizon: short- and medium-term

- Changes in demand: Demand destruction and creation arising from shifts in demand: short- and medium-term

Physical Risks: Physical risks can be event-driven (acute) or longer-term shifts (chronic) in climate patterns. Relevant time horizon: Long-term

- Acute: Increased severity of extreme weather events.

Most relevant time horizon: all, but increasing severity long term

- Chronic: Changes in weather patterns, rising temperatures, rising sea levels. Medium and long-term

Climate risk is characterised by a longer time horizon than many traditionally managed risks. To make this more explicit, short- to medium-term horizons in this context refer to a three-to-ten-year horizon, and a long-term horizon refers to the period out to 2050, although we note these are rough approximations only.

- (B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Climate risk is characterised by a longer time horizon than many traditionally managed risks. To make this more explicit, short- to medium-term horizons in this context refer to a three-to-ten-year horizon, and a long-term horizon refers to the period out to 2050, although we note these are rough approximations only. See response above or our public TCFD report on our website (“Snapshot of Climate Risk Identification and Assessment Process” Figure) for more details.

- (B) Yes, beyond our standard planning horizon**

Specify the risks and opportunities identified and your relevant standard planning horizon:

Climate risk is characterised by a longer time horizon than many traditionally managed risks. To make this more explicit, short- to medium-term horizons in this context refer to a three-to-ten-year horizon, and a long-term horizon refers to the period out to 2050, although we note these are rough approximations only. See response above or our public TCFD report on our website (“Snapshot of Climate Risk Identification and Assessment Process” Figure) for more details.

- (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

- (A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities**

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Impact on investment process is material and detailed in section 2 of our TCFD report.

Russell Investments committed in 2021 to help clients align their investment portfolios with a goal of global net zero emissions by 2050. The decision to include a portfolio in scope for net zero alignment will always be client-led, and approximately 25% of our global AUM is currently in scope. As part of our participation with the Net Zero Asset Managers initiative, we provide transparency around what targets we use for measuring portfolio net zero alignment and tracking progress.

For portfolios managed in line with net zero standards, the following interim targets apply:

- By 2025, ensure that at least 25% of the portfolio by market value is invested in companies that are aligning to net zero. To assess whether a company is aligning to net zero, we leverage the Paris Aligned Investor Initiative’s alignment maturity scale.
- Engage with companies that are the largest contributors to portfolio emissions. Our goal is to engage with those companies that make up 70% of the portfolio’s financed emissions by 2025.

- Achieve a 50% reduction in the portfolio’s carbon emissions intensity by 2030, relative to 2019.

In addition to these interim targets for our investment portfolios, we have also set a goal of reaching net zero in our own business operations by 2030.

- (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 43	CORE	N/A	N/A	PUBLIC	Climate change	General

Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above pre-industrial levels?

- (A) Yes, using the Inevitable Policy Response Forecast Policy Scenario (FPS) or Required Policy Scenario (RPS)
- (B) Yes, using the One Earth Climate Model scenario
- (C) Yes, using the International Energy Agency (IEA) Net Zero scenario

(D) Yes, using other scenarios

Specify:

NGFS (Network for Greening the Financial System) scenarios: Hot house world (current policies), delayed transition and net zero 2050

- (E) No, we have not assessed the resilience of our investment strategy in different climate scenarios, including one that holds temperature rise to below 2 degrees

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 44	CORE	N/A	N/A	PUBLIC	Climate change	General

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

Aligned with TCFD Recommendations: Risk management a), b), c)

We provide detail on how we ensure that climate-related risks are covered in different aspects of our risk management structures and processes.

- (i) how responsibilities or incentives specifically incorporate the identification, assessment and management of climate-related risks;
- (ii) how we determine the materiality of different climate risks in comparison with other risks; and
- (iii) the relative importance that each of our risk management processes gives to climate-related risks in comparison with other risks.

The first step in managing climate-related risks in investments is identifying them. There are many mechanisms through which climate-related factors impact security prices and these risks can be broadly categorized as transition or physical risks. We recognize that different risks are likely to manifest over different time horizons and that they require different tools to assess.

There are several methodologies available to assess the climate exposure of an investment portfolio. In our own analysis, we have focused on two primary pillars for our core assessment:

1. Carbon footprinting
2. Scenario analysis

We supplement these primary pillars with an additional metric, a temperature alignment score. This metric is appealing because it is easy to interpret, and as a result we expect its use to continue to grow. However, we note considerable variation exists in current methodologies. We also increasingly provide a suite of TCFD aligned metrics to clients for whom this is a focus area. By measuring exposure on a multidimensional basis, we hope to develop a more robust understanding of risk exposures both on a current and forward-looking basis. We attempt to strike a balance between providing sufficient data to draw robust conclusions, while not overwhelming decision makers with too many data points.

(2) Describe how this process is integrated into your overall risk management

Aligned with TCFD Recommendations: Risk management a), b), c)

We provide detail on how we ensure that climate-related risks are covered in different aspects of their risk management structures and processes.

- (i) how responsibilities or incentives specifically incorporate the identification, assessment and management of climate-related risks;
- (ii) how we determine the materiality of different climate risks in comparison with other risks; and
- (iii) the relative importance that each of our risk management processes gives to climate-related risks in comparison with other risks.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

Portfolio managers are the front line of defence in managing portfolio risks, and management of climate risk is no different. We employ ESG investment subject matter experts across the firm, but also believe that embedding deep expertise and awareness of sustainability risk within investment teams is key to integrating climate management into our investment process. This belief is formalized in our sustainability risk policy and our accompanying practices and systems which continue to evolve. We have expanded our Enhanced Oversight practice across asset classes and PM teams. This practice is detailed below.

We released a major enhancement to our portfolio management data systems to include extensive ESG data at the portfolio- and security-level. This information now sits alongside traditional investment data such as factor-, sector-, country- exposures so that PM teams can use it as they would any other piece of investment relevant data. Another critical tool employed is active ownership. Corporate engagements, in particular, are key to driving real world outcomes with the companies in which we invest, and we detail our approach in the TCFD and Stewardship reports. Supplementing these firm-wide practices, we continually enhance our approach to building carbon-managed portfolios for a subset of our clients and funds that want to incorporate explicit climate-related outcomes.

Finally, we conclude with a forward-looking section including our own net zero target setting. Taken together, we adopt a multi-layered approach to managing climate issues including formal policies, practices, engagement, carbon managed portfolios and target setting.

Sustainability Risks Policy

Russell Investments' policy is to integrate sustainability risks in our investment solutions by identifying, evaluating and managing relevant risks in our investment manager review process, portfolio management and through implementing proprietary solutions.

We believe sustainability risks are most relevant to investment outcomes when they exhibit financial materiality, and, like all investment risks, are incorporated by balancing expected risk with expected reward. In managing investment solutions, we consider financially-material sustainability risks in the context of expected rewards using a blend of inputs from sources including, but not limited to, investment managers, third-party data sources and Russell Investments proprietary analysis. Furthermore, we incorporate bespoke sustainability risks based on clients' requirements for customized mandates. As well, we seek to collaborate with our advisory clients to consider, monitor and manage sustainability risk priorities in their portfolios.

Enhanced Oversight

Developing a deep understanding of portfolios' financially-material sustainability risks and how they are identified is included in Russell Investments' Portfolio Managers' goals and objectives. A key component of understanding these risks comes from the oversight of our subadvisors. To systematise and track this oversight, we have initiated a practice called "Enhanced Oversight." The enhanced oversight activity focuses on securities and themes identified from:

- Our own quantitative measures, where we monitor the highest and most material sustainability risks at the total-portfolio level
- Other third-party sources including those who provide company and thematic ESG research
- Sub-advisor insights, where we respond to financially-material sustainability issues they bring to our attention.

To complement other investment practices and to maximize impact, enhanced oversight may draw from internal themes. Internal themes include but are not limited to those featured by Russell Investments' Active Ownership Team outlined in the section below. For each Russell Investments' managed fund or segregated portfolio, enhanced oversight may result in the following actions for certain holdings, with consideration of the impact of risks at the total portfolio level:

- Reviewing of metrics and the research behind the metrics
- Discussing with the subadvisor supporting the holding
- Discussing with the Engagement Subcommittee to consider engagement options

Global Risk Management

In addition to primary role that investment teams play in our risk management process, the Global Risk Management Committee (GRMC) plays a critical global role in our risk management and provides an independent global authority on the assessment of climate risk and needed controls essential to effective management of the firm's climate risk.

More details on how this group fits into our overall governance is provided in Section 1.

(2) Describe how this process is integrated into your overall risk management

Alignment with TCFD Recommendations: Risk management a), b), c)

We provide detail on how we ensure that climate-related risks are covered in different aspects of our risk management structures and processes.

- (i) how responsibilities or incentives specifically incorporate the identification, assessment and management of climate-related risks;
- (ii) how we determine the materiality of different climate risks in comparison with other risks; and
- (iii) the relative importance that each of our risk management processes gives to climate-related risks in comparison with other risks.

We have answered this question above in the context of our process (under Q1). In short, climate risk management is integrated into our standard risk management processes (portfolio management and GRMC systems), as well as supplemented with active ownership, carbon managed portfolios and target setting.

- (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

SUSTAINABILITY OUTCOMES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 47	CORE	N/A	Multiple indicators	PUBLIC	Sustainability outcomes	1, 2

Has your organisation identified the intended and unintended sustainability outcomes connected to its investment activities?

(A) Yes, we have identified one or more specific sustainability outcomes connected to our investment activities

(B) No, we have not yet identified the sustainability outcomes connected to any of our investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 47.1	CORE	PGS 47	N/A	PUBLIC	Sustainability outcomes	1, 2

Which widely recognised frameworks has your organisation used to identify the intended and unintended sustainability outcomes connected to its investment activities?

(A) The UN Sustainable Development Goals (SDGs) and targets

(B) The UNFCCC Paris Agreement

(C) The UN Guiding Principles on Business and Human Rights (UNGPs)

(D) OECD frameworks: OECD Guidelines for Multinational Enterprises and Guidance on Responsible Business Conduct for Institutional Investors

- (E) The EU Taxonomy
- (F) Other relevant taxonomies
- (G) The International Bill of Human Rights

(H) The International Labour Organization’s Declaration on Fundamental Principles and Rights at Work and the eight core conventions

- (I) The Convention on Biological Diversity
- (J) Other international framework(s)
- (K) Other regional framework(s)
- (L) Other sectoral/issue-specific framework(s)
 - o (M) Our organisation did not use any widely recognised frameworks to identify the intended and unintended sustainability outcomes connected to its investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 47.2	CORE	PGS 47	PGS 48	PUBLIC	Sustainability outcomes	1, 2

What are the primary methods that your organisation has used to determine the most important intended and unintended sustainability outcomes connected to its investment activities?

- (A) Identify sustainability outcomes that are closely linked to our core investment activities**
- (B) Consult with key clients and/or beneficiaries to align with their priorities**
- (C) Assess which actual or potential negative outcomes for people are most severe based on their scale, scope, and irremediable character**
- (D) Identify sustainability outcomes that are closely linked to systematic sustainability issues**
- (E) Analyse the input from different stakeholders (e.g. affected communities, civil society, trade unions or similar)
- (F) Understand the geographical relevance of specific sustainability outcome objectives
- (G) Other method
- o (H) We have not yet determined the most important sustainability outcomes connected to our investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 48	CORE	PGS 47.2	PGS 48.1, SO 1	PUBLIC	Sustainability outcomes	1, 2

Has your organisation taken action on any specific sustainability outcomes connected to its investment activities, including to prevent and mitigate actual and potential negative outcomes?

- (A) Yes, we have taken action on some of the specific sustainability outcomes connected to our investment activities**
- o (B) No, we have not yet taken action on any specific sustainability outcomes connected to our investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 48.1	PLUS	PGS 48	N/A	PUBLIC	Sustainability outcomes	1, 2

Why has your organisation taken action on specific sustainability outcomes connected to its investment activities?

- (A) We believe that taking action on sustainability outcomes is relevant to our financial risks and returns over both short- and long-term horizons
- (B) We believe that taking action on sustainability outcomes, although not yet relevant to our financial risks and returns, will become so over a long-time horizon
- (C) We have been requested to do so by our clients and/or beneficiaries
- (D) We want to prepare for and respond to legal and regulatory developments that are increasingly addressing sustainability outcomes
- (E) We want to protect our reputation, particularly in the event of negative sustainability outcomes connected to investments
- (F) We want to enhance our social licence-to-operate (i.e. the trust of beneficiaries, clients, and other stakeholders)
- (G) We believe that taking action on sustainability outcomes in parallel to financial return goals has merit in its own right
- (H) Other

HUMAN RIGHTS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49	PLUS	PGS 47	PGS 49.1	PUBLIC	Human rights	1, 2

During the reporting year, what steps did your organisation take to identify and take action on the actual and potentially negative outcomes for people connected to your investment activities?

- (A) We assessed the human rights context of our potential and/or existing investments and projected how this could connect our organisation to negative human rights outcomes

Explain how these activities were conducted:

We share the market wide expectation that companies should operate within internationally accepted norms and standards related to human rights, labour rights, the environment, and business ethics. When companies fail to operate within these norms, they risk negatively impacting societal stakeholders and/or the environment. This poses reputational risks for the company and for those who invest in it, and it can potentially destroy shareholder value.

Russell Investments uses the Global Standards Screening (GSS) from Sustainalytics to monitor our actively managed portfolios from this perspective. The provider issues an opinion as to whether a company is violating, or is at risk of violating, one or more of the UN Global Compact principles and related international norms and standards. Sustainalytics applies its own guidelines to assess company compliance with relevant international norms, assigning one of the following three statuses: Non-Compliant, Watchlist or Compliant.

- (B) We assessed whether individuals at risk or already affected might be at heightened risk of harm

- (C) We consulted with individuals and groups who were at risk or already affected, their representatives and/or other relevant stakeholders such as human rights experts
- (D) We took other steps to assess and manage the actual and potentially negative outcomes for people connected to our investment activities
- (E) We did not identify and take action on the actual and potentially negative outcomes for people connected to any of our investment activities during the reporting year

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SAM 11	PLUS	OO 14, OO 21	N/A	PUBLIC	Responsible investment practices	1

Describe an innovative practice you adopted as part of monitoring your external investment managers' responsible investment practices in a specific asset class during the reporting year.

Portfolio managers manage sustainability risks in our investment solutions through our quarterly and annual manager review process and through implementing proprietary solutions. Through a process we call 'Enhanced Oversight' (EO), portfolio management teams assess sustainability risks in funds and explain how those risks are being monitored and managed. EO is designed to provide sufficiently granular insights into fund/portfolio exposures - without adopting a 'checklist' approach that would fail to recognize the breadth, complexity, and relevance of sustainability issues. EO focuses on broad ESG themes as well as specific securities identified from:

- Our own quantitative analysis, where we monitor the highest and most material sustainability risks at the total-portfolio level
- Sub-adviser insights, whom we explicitly direct to highlight financially-material sustainability issues
- Other third-party sources including those who provide company and thematic ESG research

Quantitative analysis is used to identify securities with higher material sustainability risks where data is available and robust, particularly in equities where our primary data sets include Sustainalytics' Risk Rating, Carbon Footprint and Russell Investments' Material ESG Score. Russell Investments' proprietary Material ESG Score is designed to highlight sustainability issues that are relevant and specific to a particular company and its industry. In calculating this score, we utilize Sustainalytics, SASB's Materiality Map, corporate governance scores, environmental data from multiple providers and an emphasis on forward-looking information where available. While EO was first developed and deployed as a tool for sustainably focused equity funds, in 2022 we worked to adapt and extend its application across all asset classes and portfolios.

ENGAGEMENT AND ESCALATION

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SAM 15	PLUS	OO 14, OO 21	N/A	PUBLIC	Engagement and escalation	4

Describe how your organisation engaged with external investment managers to improve their responsible investment practices during the reporting year.

Our manager due diligence process includes an assessment and discussion of the manager’s ESG capabilities, including their active ownership approach. Manager due diligence meetings are conducted at least annually with managers selected for use in Russell Investments’ funds. In addition, Russell Investments’ portfolio managers conduct quarterly performance reviews of sub-advisors in funds that include specific attention to the manager’s identification, assessment, and management of sustainability risks, including their stewardship activities. In certain cases, we may undertake joint engagement with our sub-adviser partners.

Russell Investments conducts an annual ESG Survey amongst our high interest and preferred sub-advisor partners on trends in ESG resourcing, data sources, implementation, ESG integration, and active ownership. We make these results available to participants, and in this way, provide additional insight to our partners on the evolution of industry responsible investing best practices.

ESG INCORPORATION IN PORTFOLIO CONSTRUCTION

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
LE 5	PLUS	OO 21	N/A	PUBLIC	ESG incorporation in portfolio construction	1

Provide an example of how you incorporated ESG factors into your equity selection and research process during the reporting year.

Russell Investments' manager research analysts are monitoring more than 300 products which target an explicit ESG or sustainable objective. Consistent with our traditional investment universes, less than 10% of these strategies have earned a positive formal rank from our research analysts. Our portfolio managers and clients can leverage these recommendations and research when constructing multi-manager portfolios with ESG or sustainable goals.

Outcome

Leveraging the research analysts' efforts, in 2022 Russell Investments developed an active, ESG-focused global equity solution for a Japanese client. The portfolio included a set of managers which earned high-conviction ratings for their return potential but also the highest scores for ESG integration using a framework that considers a strategy's sustainable "Intent", "Process", and "Outcome". Moreover, the combination of managers allowed for a diversity of philosophies and exposures, including one which focused on investing in companies with high alignment to the United Nations' Sustainable Development Goals (SDGs) and a value manager which applies a high scrutiny ESG lens to invest in best-in-class and improving companies. This solution, and others like it, are enabled by our breadth of ESG coverage and the experience of our manager research team

(A) Yes, we have a formal process that includes scenario analyses - Specify: (Voluntary)

Some of the scenario analysis includes a strategic review of the investment universe. As the fixed income market continues to evolve in ways to incorporate ESG related information in the analysis not only within the corporate bond market, but also sovereign bonds and securitized markets, we monitor the ESG trends across the fixed income markets and try to incorporate as much as feasible. For instance, we have worked with some of the sub-advisors to assess the potential performance implications for various level of impact bond allocation in order to strike a balance of financial return and an impact bond exposure around the impact bonds (i.e. green bonds). Understanding the ESG market trends have assisted us in such considerations.

For each sustainability outcome, provide details of up to two of your nearest-term targets.

(A1) Sustainability Outcome #1: Target details

(A1) Sustainability Outcome #1:	The UNFCCC Paris Agreement
(1) Target name	Net Zero Asset Managers Initiative
(2) Baseline year	2019
(3) Target to be met by	2050
(4) Methodology	<p>Russell Investments uses the Paris Aligned Investor Initiative's Net Zero Investment Framework as our principal methodology for assessing portfolio alignment to net zero and interim portfolio target setting. Our approach to net zero alignment is client- and solutions-led. Our initial efforts are centred on net-zero committed clients, sustainable solutions, and regions where transition alignment is a client objective. We currently estimate 25% of our total AUM to be in scope for net zero target setting. We have only included equities and corporate debt in our initial targets after assessing that these asset class methodologies were the most robust. Other methodologies & data availability will continue to improve, and we will aspire to phase in additional asset classes in conjunction with clients for whom this is an important objective over the coming years.</p> <p>This methodology involves the use of three targets:</p> <ol style="list-style-type: none"> 1. Portfolio Decarbonisation Reference Target (emissions target) 2. Portfolio asset alignment (Portfolio coverage target) 3. Engagement target <p>Over time, we also intend to add an allocation to climate solutions target as data quality of EU taxonomy information improves</p>
(5) Metric used (if relevant)	Carbon emissions, portfolio alignment

(6) Absolute or intensity-based (if relevant)

(2) Intensity-based

(7) Baseline level or amount (if relevant):

Emissions baseline: 234 tCO₂e/\$M Revenue USD
Asset alignment baseline: 15% of AUM in material sectors is considered net zero, aligned or aligning to net zero
Engagement target: 65% of financed emissions in material sectors are either aligned to net zero or subject to direct or collective engagement and stewardship actions

(8) Target level or amount (if relevant)

Emissions intensity: -50% by 2030
Asset alignment: 25% by 2025
Engagement: 70% aligned or subject to direct or collective engagement by 2025

(9) Percentage of total AUM covered in your baseline year for target setting

25%

(10) Do you also have a longer-term target for this?

(2) No

INDIVIDUAL AND COLLABORATIVE INVESTOR ACTION ON OUTCOMES

LEVERS USED TO TAKE ACTION ON SUSTAINABILITY OUTCOMES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 5	PLUS	SO 2	Multiple	PUBLIC	Levers used to take action on sustainability outcomes	1, 2, 5

During the reporting year, which of the following levers did your organisation use to take action on sustainability outcomes, including to prevent and mitigate actual and potential negative outcomes?

- (A) Stewardship with investees, including engagement, (proxy) voting, and direct influence with privately held assets
Select from drop down list:
 - (1) Individually
 - (2) With other investors or stakeholders
- (B) Stewardship: engagement with external investment managers
Select from drop down list:
 - (1) Individually
 - (2) With other investors or stakeholders
- (C) Stewardship: engagement with policy makers
Select from drop down list:
 - (1) Individually
 - (2) With other investors or stakeholders
- (D) Stewardship: engagement with other key stakeholders
Select from drop down list:
 - (1) Individually
 - (2) With other investors or stakeholders
- (E) Capital allocation
- (F) Our organisation did not use any of the above levers to take action on sustainability outcomes during the reporting year

CAPITAL ALLOCATION

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 6	PLUS	SO 5	N/A	PUBLIC	Capital allocation	1

During the reporting year, how did your organisation use capital allocation to take action on sustainability outcomes, including to prevent and mitigate actual and potential negative outcomes?

(A) Across all sustainability outcomes

(1) Capital allocation activities used	(1) Asset class allocation (2) Sector allocation (3) Selection of and allocation to third-party funds (4) Divestment from assets or sectors
(2) Explain through an example	For Dublin and Australian-domiciled funds, we exclude certain activities across the fund range. This includes tobacco companies and companies identified as manufacturing controversial weapons.

(B) Sustainability Outcome #1:

(B) Sustainability Outcome #1:	The UNFCCC Paris Agreement
(1) Capital allocation activities used	(1) Asset class allocation (2) Sector allocation (3) Selection of and allocation to third-party funds (4) Divestment from assets or sectors
(2) Explain through an example	For portfolios managed in line with net zero, a thermal coal phase out policy applies. Specifically, these assets will phase out of thermal coal by 2030 in OECD countries and by 2040 in the rest of the world for net zero aligned investments. Russell Investments' Global Exclusions Committee will continue to assess our policy on coal and other fossil fuels over time, incorporating the latest climate science, considerations for a just transition, while acknowledging a practical need for energy security. Currently portfolios include an exclusion on companies generating more than 25% revenue from thermal coal, and for companies that generate between 10-25% revenue from coal, an additional assessment of their transition plan is required for the company to be investible.

STEWARDSHIP WITH INVESTEES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 8	PLUS	SO 5	N/A	PUBLIC	Stewardship with investees	2

During the reporting year, how did your organisation use stewardship with investees to take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

(A) Across all sustainability outcomes

(1) Describe your approach

(2) Stewardship tools or activities used

(3) Example

(B) Sustainability Outcome #1:

(B) Sustainability Outcome #1:

The UNFCCC Paris Agreement

(1) Describe your approach

Our active ownership program encompasses three pillars namely engagement, proxy voting and industry collaboration. Each of which is described in turn below:

Engagement

Ongoing dialogue with companies is a fundamental part of our responsible investing strategy. Our engagement approach is to build a mutually beneficial long-term relationship with the investee companies and to help them set a direction of travel from an ESG perspective. For the purposes this Net Zero target, we provide a subset of information as it pertains to our management of climate-related issues.

Engagement focus areas

At Russell Investments, we believe that the key to a successful engagement programme is identifying and pursuing activities which offer the highest return or risk mitigation opportunities. To this end, Russell Investments' Active Ownership Team strategy is focused on material issues under the general categories of Environment, Social, and Governance. While we recognise that a broad set of issues are worthy of shareholder attention, we believe that identifying engagement focus areas, supports accountability and successful outcomes. Russell Investments maintains six focus areas which have been chosen through consideration of our clients' expectations, our proxy voting and engagement practices through time, our corporate values, and our responsible investing beliefs. Two of these areas are environmentally focused: Climate Change Resilience, and Natural Capital. We provide a brief overview of these themes below:

- Engaging on climate change resilience

Russell Investments has been an official supporter of the TCFD since 2019, and we promote the TCFD's recommendation that companies provide effective climate-related disclosures that enable more informed financial decision making. In addition, we advocate for companies to have board-level oversight and governance of climate change impacts. Finally, Russell Investments expects companies to explain how they have implemented climate-related issues into their business, strategy, and financial planning – including the disclosure of key metrics and risk management processes.

- Engaging on natural capital

Measuring and valuing natural capital can provide companies with detailed statistics for better management of natural resources that contribute to economic development and growth. Better understanding of the mechanisms that link ecological systems to human wellbeing are required to assess both the value of benefits from natural resource systems, and the expenditure required to maintain those benefits.

Russell Investments believes that companies should display an understanding of their environmental resource use across their businesses, and demonstrate responsible environmental management aimed at maintaining the long-term usage of assets. We expect companies to implement sound and sustainable environmental practices across their operations and supply chains to protect against material and reputational risks which can arise from the mismanagement of natural capital.

Initiatives and policies that avoid and/or reduce deforestation is an area of focus for Russell Investments. We advocate for disclosure as a starting point. In addition, for companies with material biodiversity exposure, and/or those which operate in natural resource-constrained regions, we seek policies on restoration, preservation, and efforts to control any soil and water contamination.

Collaborative engagements

Since early 2020, Russell Investments has leveraged a partnership with Sustainalytics for thematic and collaborative engagements. Sustainalytics' engagement programmes enable participants to build relationships with a selected set of issuers to encourage action on specific issues in ways that promote longterm value. Russell Investments has selected engagement themes that align with our focus areas and provide expertise and access in areas where partnership increases the likelihood of success. Across all five themes selected, our investment professionals participate directly in calls with the targeted companies.

Proxy Voting

For 30 years, Russell Investments has executed a robust proxy voting programme built on policies, processes and guidelines that are consistently evaluated and evolved. In recent years, we have scrutinised our guidelines relating to environmental and social issues to ensure they reflect our latest thinking on these issues. Whilst our bespoke Proxy Voting Guidelines include context for our ESG beliefs, a case-by-case review allows us to vote on the merits of individual proposals, rather than apply a general stance on a given issue.

Further information can be found in our Investment Stewardship Report.

(2) Stewardship tools or activities used

(1) Engagement
(2) (Proxy) voting at shareholder meetings
(7) Working directly with portfolio companies and/or real asset management teams

(3) Example

In 2022, Russell Investments followed-up with a Japanese cement company on its climate change resilience program. Following engagement in 2021, the company was working to improve environmental reporting. Russell Investments continued the conversation as the company integrates consideration of material climate risks into its business operations.

The company has made progress in its strategic approach and implementation on climate initiatives.

- GHG reduction targets: The company aligned its public commitments to reduce GHG emissions with the Paris Agreement.
- Industry alignment: It is working with the Science Based Targets Initiative to publish industry-wide guidance for the cement sector.
- Capital planning: The company has released a plan showing how its strategic approach to climate change is integrated in its business planning.

Outcome

Russell Investments plans to continue engaging with the company as it further realizes commercial benefits from its climate change resilience strategies. Engagement will focus on understanding its path to industry leadership and gaining market share as it explores opportunities from its integrated climate-aware strategy.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 9	PLUS	SO 5	N/A	PUBLIC	Stewardship with investees	2

How does your organisation prioritise the investees you conduct stewardship with to take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

(A) We prioritise the most strategically important companies in our portfolio.

Describe how you do this:

At Russell Investments, we hold thousands of securities on behalf of our clients. Our engagements are conducted to ensure broad consideration and consistent application of our processes across geographies, sectors and market cap. However, given the breadth of our investment operations and clients' interests, we leverage data and research to focus our efforts on the highest return or risk mitigation opportunities.

Russell Investments considers the following criteria when selecting targets for engagement:

- Russell Investments' ownership stake, as percent of shares outstanding and/or weight of fund exposure;
- Proxy voting history and management responsiveness to shareholder concerns;
- ESG analysis performed in-house and by third-party vendors of ESG metrics focusing on sub-industry peer comparison and ESG-related controversies;
- Research and analysis from Glass Lewis, our proxy voting administrator;
- Any history of previous engagement activity; and
- Opportunities highlighted by our sub-advisers.

Engagement targets are finalized using the input and insights of our portfolio management teams and approved by Russell Investments' Investment Strategy Committee.

Select from the list:

- 1
- 4

(B) We prioritise the companies in our portfolio most significantly connected to sustainability outcomes.

Describe how you do this:

Climate Action 100+ is an investor initiative launched in 2017 to ensure the world's largest corporate greenhouse gas emitters take necessary action on climate change. We joined the Climate Action 100+ initiative in early 2020 and have directly engaged with a select number of companies on climate transition through the regional entities.

Select from the list:

- 2
- 4

(C) We prioritise the companies in our portfolio to ensure that we cover a certain proportion of the sustainability outcomes we are taking action on.

Describe how you do this:

A consistent theme throughout alignment frameworks is the need for multiple levels of targets. In particular, there is growing recognition that achieving an overall portfolio carbon reduction or temperature score alone is not sufficient. Instead, most frameworks propose a combination of an overall portfolio target, for example a carbon reduction or temperature alignment, in addition to increasing the percent of the portfolio's assets that can be considered aligned. Engagement also has an important role, as a mechanism to encourage decarbonisation of the largest emitters in the portfolio rather than simply divesting from them. This is because decarbonisation of the largest emitters will be critical to achieving the global goal of net zero.

STEWARDSHIP WITH EXTERNAL INVESTMENT MANAGERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 10	PLUS	OO 5, SO 5	N/A	PUBLIC	Stewardship with external investment managers	2

During the reporting year, how did your organisation, or the external service providers acting on your behalf, engage with external investment managers to ensure that they take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

(A) Across all sustainability outcomes

(1) Describe your approach

(B) Sustainability Outcome #1:

(B) Sustainability Outcome #1:

The UNFCCC Paris Agreement

(1) Describe your approach

Developing a deep understanding of portfolios' financially-material sustainability risks and how they are identified is included in Russell Investments' Portfolio Managers' goals and objectives. A key component of understanding these risks comes from the oversight of our sub-advisers. To systematise and track this oversight, we have initiated a practice called "Enhanced Oversight."
The enhanced oversight activity focuses on securities and themes identified from: Our own quantitative measures, where we monitor the highest and most material sustainability risks at the total-portfolio level

- Other third-party sources including those who provide company and thematic ESG research
- Sub-adviser insights, where we respond to financially-material sustainability issues they bring to our attention.

To complement other investment practices and to maximise impact, enhanced oversight may draw from internal themes. Internal themes include but are not limited to those featured by Russell Investments' Active Ownership Team outlined in the section below.

For each Russell Investments' managed fund or segregated portfolio, enhanced oversight may result in the following actions for certain holdings, with consideration of the impact of risks at the total portfolio level:

- Reviewing of metrics and the research behind the metrics
- Discussing with the sub-adviser supporting the holding
- Discussing with the Engagement Subcommittee to consider engagement options

STEWARDSHIP: ENGAGEMENT WITH POLICY MAKERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 11	PLUS	SO 5	N/A	PUBLIC	Stewardship: Engagement with policy makers	2

During the reporting year, how did your organisation use engagement with policy makers to take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

(A) Across all sustainability outcomes

(2) Engagement tools or activities used

(3) Example(s) of policies engaged on

(B) Sustainability Outcome #1:

(B) Sustainability Outcome #1:	Net Zero
(1) Describe your approach	We actively collaborate in initiatives with industry participants, regulatory working group and other stakeholders to collectively deliver a well-functioning financial system.
(2) Engagement tools or activities used	(1) We participated in 'sign-on' letters (2) We responded to policy consultations
(3) Example(s) of policies engaged on	Department of Labor (DOL) In the United States, we have joined industry trade associations and worked directly with the Department of Labor to improve the language associated with how The Employee Retirement Income Security Act of 1974 (ERISA) plan sponsors consider financially- material factors related to ESG.

STEWARDSHIP: ENGAGEMENT WITH OTHER KEY STAKEHOLDERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 12	PLUS	SO 5	N/A	PUBLIC	Stewardship: Engagement with other key stakeholders	2, 5

Does your organisation engage with other key stakeholders to support the development of financial products, services, research, and/or data aligned with global sustainability goals and thresholds?

(A) Across all sustainability outcomes

(1) Key stakeholders engaged
(2) Provide further detail on your engagement

(B) Sustainability Outcome #1:

(B) Sustainability Outcome #1:	Net Zero
(1) Key stakeholders engaged	(1) Standard setters (2) Reporting bodies (6) External service providers (e.g. proxy advisers, investment consultants, data providers)
(2) Provide further detail on your engagement	Investment Association (IA) Collaborations in 2022 include attending multiple industry seminars and responding to the FCA proposed rules on sustainability.

STEWARDSHIP: COLLABORATION

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 13	PLUS	SO 5	N/A	PUBLIC	Stewardship: Collaboration	2

During the reporting year, to which collaborative initiatives did your organisation contribute to take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

(A) Initiative #1

(1) Name of the initiative	Principles for Responsible Investment (PRI)
(2) Indicate how your organisation contributed to this collaborative initiative	(C) We publicly endorsed the initiative
(3) Provide further detail on your participation in this collaborative initiative	As a signatory to the PRI since 2009, Russell Investments has a long-standing relationship with the organization and has completed PRI assessment annually. Russell Investments incorporates the PRI principles into our processes including through manager research, portfolio management, and proxy voting and engagement. Furthermore, we purposefully assess the initiatives and consultations driven by PRI, and we participate where relevant.

(B) Initiative #2

(1) Name of the initiative	Climate Action 100+
(2) Indicate how your organisation contributed to this collaborative initiative	(A) We were a lead investor in one or more focus entities (e.g. investee companies) (B) We acted as a collaborating investor in one or more focus entities (e.g. investee companies) (C) We publicly endorsed the initiative
(3) Provide further detail on your participation in this collaborative initiative	Climate Action 100+ is an investor initiative launched in 2017 to ensure the world's largest corporate greenhouse gas emitters take necessary action on climate change. As members of the Climate Action 100+ initiative since early 2020, and in line with our Net Zero commitment, Russell Investments has engaged with a selected number of companies on climate transition to support the initiative's goal. To this end, during 2022 we have actively contributed to the working group in the respect of the companies we engage with. Furthermore, we supported the majority of proxy voting resolutions flagged by the initiative, which is a clear expression of preference on issues directly related to the initiative's goals.

(C) Initiative #3

(1) Name of the initiative	Carbon Disclosure Project (CDP)
(2) Indicate how your organisation contributed to this collaborative initiative	(B) We acted as a collaborating investor in one or more focus entities (e.g. investee companies) (C) We publicly endorsed the initiative
(3) Provide further detail on your participation in this collaborative initiative	We use the global disclosure system provided by CDP as one of several sources that help us to manage environmental impact in our portfolios. We have also collaborated with CDP in engagement campaigns; for example, during 2022 we supported a campaign that targets 1,200 high impact companies on committing and setting a 1.5 degree-aligned, SBTi approved science-based emissions reduction target.

(D) Initiative #4

(1) Name of the initiative	Institutional Investing Diversity Cooperative (IIDC)
(2) Indicate how your organisation contributed to this collaborative initiative	(C) We publicly endorsed the initiative (G) We were part of an advisory committee or similar

(3) Provide further detail on your participation in this collaborative initiative

IIDC members meet regularly to discuss key initiatives and specific action items that can encourage asset managers to offer more robust and comprehensive diversity data. We are actively involved in IIDC through regular meetings, ad-hoc sub-committee projects, and industry event speaking opportunities.

CONFIDENCE-BUILDING MEASURES (CBM)

CONFIDENCE-BUILDING MEASURES

APPROACH TO CONFIDENCE-BUILDING MEASURES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
CBM 1	CORE	N/A	Multiple indicators	PUBLIC	Approach to confidence-building measures	6

How did your organisation verify the information submitted in your PRI report this reporting year?

- (A) We conducted independent third-party assurance of selected processes and/or data related to the responsible investment processes reported in our PRI report, which resulted in a formal assurance conclusion
- (B) We conducted a third-party readiness review and are making changes to our internal controls or governance processes to be able to conduct independent third-party assurance next year
- (C) We conducted an internal audit of selected processes and/or data related to the responsible investment processes reported in our PRI report
- (D) Our board, trustees (or equivalent), senior executive-level staff (or equivalent), and/or investment committee (or equivalent) signed off on our PRI report
- (E) We conducted an external ESG audit of our holdings to verify that our funds comply with our responsible investment policy
- (F) We conducted an external ESG audit of our holdings as part of risk management, engagement identification or investment decision-making
- (G) Our responses in selected sections and/or the entirety of our PRI report were internally reviewed before submission to the PRI
- (H) We did not verify the information submitted in our PRI report this reporting year

Provide details of the internal audit process regarding the information submitted in your PRI report.

An independent Internal Audit (IA) team undertakes a rolling agenda of review on a range of key investment activities. The purpose of Russell Investments Group Internal Audit function is to provide independent and objective assurance and consulting services designed to improve the organization's controls and operations. Internal Audit accomplishes this by providing risk-based and objective assurance, advice, and insight to enhance and protect organizational value. Internal Audit helps the organization accomplish its objectives by bringing a systematic, disciplined approach to test, evaluate and improve the effectiveness of governance, risk management and control processes. The Russell Investments Group Internal Audit function utilizes a risk-based approach in developing the annual audit plan. The audit universe of key processes is assessed to focus the audit plan on the areas of highest risk. Any issues identified by Internal Audit require management action plans (MAPs) and are tracked to resolution by Internal Audit. The status of open issues is regularly reported to relevant boards and audit committees. Internal Audit validates resolution to close issues identified.

The IA process involves a structured assessment of key processes and risks, including detailed testing of mitigating controls across the organization. These audits are designed to assess if systems and procedures are effective, efficient and function as designed, thereby helping ensure:

- risks are appropriately identified and managed;
- quality and continuous improvement are fostered in the organization's control process;
- significant financial, managerial, and operating information is prepared accurately and reliably; and
- resources are adequately protected.

INTERNAL REVIEW

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
CBM 6	CORE	CBM 1	N/A	PUBLIC	Internal review	6

Who in your organisation reviewed the responses submitted in your PRI report this year?

- (A) Board, trustees, or equivalent
- (B) Senior executive-level staff, investment committee, head of department, or equivalent
 - Sections of PRI report reviewed
 - (1) the entire report
 - (2) selected sections of the report
 - (C) None of the above internal roles reviewed selected sections or the entirety of the responses submitted in our PRI report this year
