

RISK VS RETURN

2024 EDITION

Different asset classes – like shares, bonds and property securities – carry different levels of risk and return. Investing in a single asset class is risky when you consider no one asset class consistently outperforms on a regular basis.

Our goal at Russell Investments is to strategically diversify your portfolio across asset classes, investment strategies, managers and styles, thereby aiming to reduce risk and help you weather every season of the market.

Our multi-asset, open architecture approach means no matter which asset, strategy or style is in favour at any given time, the complementary blending of asset classes, strategies, styles and managers can help provide more consistent returns through all environments.
