

Fund Profile

An in-depth look at Russell Investments' Sector Funds

Russell Investments Low Carbon Global Shares Fund

The Russell Investments Low Carbon Global Shares Fund (the Fund) provides investors with a sustainable investment solution that supports the management of climate change risk and the transition to a low carbon economy. Designed with Russell Investments' proprietary decarbonisation investment strategy, the Fund comprehensively considers the value and measure of carbon, green energy and environmental, social and governance (ESG) characteristics.

Investment approach

The Fund is designed to provide access to a broad range of global shares, in developed and emerging markets, with a reduced exposure to carbon emissions and fossil fuel reserves by 50% compared to its benchmark.

The Fund goes beyond carbon reduction alone, aiming to provide an increased exposure to renewable energy, an improved aggregate ESG profile and a targeted reduction in coal exposure.

The investment team uses a systematic portfolio construction approach beginning with the MSCI All Countries World

Index (ACWI) ex Australia. The team is then able to tilt the portfolio away from companies with high exposure to carbon-intensive activities and increase weighting in those companies with positive ESG characteristics, as well as those involved in the development of renewable energy.

The Fund applies asset, sector, industry and country constraints and minimises active share to effectively deliver low tracking error. This portfolio construction process negates unintuitive outcomes that can arise with other optimisation techniques.

"The Fund significantly reduces exposure to carbon risk, while maintaining global equity returns."

Quick Overview

Inception date: 10th October 2017

Benchmark: MSCI ACWI ex Australia Index Net

AUM: \$586.79 million (as at 31/03/2020)

Recommended timeframe: At least 7 years

Russell Investments Low Carbon Global Shares Fund

Our proprietary decarbonisation strategy delivers the following characteristics:

FACTOR	CHARACTERISTICS
CARBON EMISSIONS	Reduction of 50% compared to benchmark
CARBON RESERVES	Reduction of 50% compared to benchmark
GREEN ENERGY	Improve green energy ratio. Target firms that are positively exposed to renewable power generation
COAL MINING AND POWER GENERATION	Zero holding of companies with significant involvement in coal-related activities ¹
ESG	Maintain or improve ESG score

With a strong focus on sustainable investment considerations, the Fund captures additional exclusion criteria including:

FACTOR	EXCLUSION CRITERIA
TOBACCO	Exclusion of companies that manufacture cigarettes and other tobacco products
NUCLEAR WEAPONS CLUSTER MUNITIONS AND ANTI-PERSONNEL MINES	Exclusion of companies involved in the core system or components of weapons system ²
URANIUM	Exclusion of uranium corporations ³

¹ The Fund excludes companies with significant involvement in coal-related activities as defined by companies with more than 10% of their revenue derived from mining thermal coal or coal power generation. In addition to the above criteria, forward-looking information about a company's overall positioning for an energy transition is considered. Specifically, companies who produce more than 10% of their power generation from renewable sources may be exempt and companies who have made public commitments to fully divest from their coal-related activities or reach zero emissions by 2050, and have made tangible progress towards that goal may also be exempt.

² Considered tailor-made and essential for lethal use

³ According to SIC 1094 and NAICS

Monitoring the sustainability agenda

Sustainability will continue to be a key determinant of risk and opportunity for companies globally and will likely evolve over time. Our active sustainability research agenda will ensure that the Fund's strategy will adapt to reflect the changing market conditions, within a risk controlled framework.

Currency Hedge Class

The Fund includes an option to invest in an Australian dollar hedged (AUDH) Class. The AUDH class is designed to limit the impact of global currency movements on the performance of the Class. Currency hedging is implemented using derivative instruments which are entered into for the benefit and at the cost of the Class only.
