Directors' report

The directors of Russell Investment Management Ltd (ABN 53 068 338 974 AFSL No. 247185), the responsible entity of Russell Investments Global Opportunities Fund (the "Fund"), present their report together with the financial statements of the Fund, for the year ended 30 June 2021.

Principal activities

The Fund invests predominantly in a broad range of international shares listed on stock exchanges in developed and emerging international markets. The Fund may also engage in the use of derivatives as set out in the Fund's governing documents and in accordance with the provisions of the Fund's constitution.

The Fund utilises a multi-asset, multi-style, multi-manager investment approach which combines the individual strengths of multiple investment managers.

The Fund did not have any employees during the year.

There were no significant changes in the nature of the Fund's activities during the year or since the end of the year and up to the date of this report.

Directors

The following persons held office as directors of Russell Investment Management Ltd during the year or since the end of the year and up to the date of this report:

Peter Gunning
Jodie Hampshire
Symon Parish
Bronwyn Yates
Richard Smirl (resigned, effective 30 April 2021)

Review and results of operations

The directors and management continue to assess the potential financial and other impacts to the Fund of the actions taken to address the coronavirus (COVID-19) outbreak. The current high-level of uncertainty regarding severity and length of the outbreak and the depth and duration of the associated effects on economic and business activity and on investment markets has impacted investment outcomes and increased volatility in investment performance during the year.

There have been no other significant changes to the Fund's operations since the previous financial year. During the year, the Fund continued to invest in accordance with its investment objective and investment strategy as set out in the governing documents of the Fund and the provisions of the Fund's constitution.

Matters subsequent to the end of the financial year

No matter or circumstance has arisen since 30 June 2021 that has significantly affected, or may significantly affect:

- (i) the operations of the Fund in future financial years, or
- (ii) the results of those operations in future financial years, or
- (iii) the state of affairs of the Fund in future financial years.

Likely developments and expected results of operations

The Fund will continue to be managed in accordance with the investment objectives and guidelines as set out in the governing documents of the Fund and in accordance with the provisions of the Fund's constitution.

The results of the Fund's operations will be affected by a number of factors, including the performance of investment markets in which the Fund invests. Investment performance is not guaranteed and future returns may differ from past returns. As investment conditions change over time, past returns should not be used to predict future returns.

Further information on likely developments in the operations of the Fund and the expected results of those operations have not been included in this report because the responsible entity believes it would be likely to result in unreasonable prejudice to the Fund.

Indemnity and insurance of officers and auditors

No insurance premiums are paid for out of the assets of the Fund in regards to insurance cover provided to either the officers of Russell Investment Management Ltd or the auditors of the Fund. So long as the officers of Russell Investment Management Ltd act in accordance with the Fund's constitution and the Law, the officers remain indemnified out of the assets of the Fund against losses incurred while acting on behalf of the Fund. The auditors of the Fund are in no way indemnified out of the assets of the Fund.

Directors' report (continued)

Fees paid to and interests held in the Fund by the responsible entity or its associates

Fees paid to the responsible entity and its associates out of Fund property during the year are disclosed in note 16 of the financial statements.

No fees were paid out of Fund property to the directors of the responsible entity during the year.

The number of interests in the Fund held by the responsible entity or its associates as at the end of the financial year are disclosed in note 16 of the financial statements.

Interests in the Fund

The movement in units on issue in the Fund during the year is disclosed in note 11 of the financial statements.

The value of the Fund's assets and liabilities is disclosed in the statement of financial position and derived using the basis set out in note 2 of the financial statements.

Environmental regulation

The operations of the Fund are not subject to any particular or significant environmental regulations under Commonwealth, State or Territory law.

Rounding of amounts to the nearest thousand dollars

Amounts in the Directors' report have been rounded to the nearest thousand dollars in accordance with *Australian Securities & Investments Commission ("ASIC") Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191*, unless otherwise indicated.

Auditor's independence declaration

A copy of the Auditor's independence declaration as required under section 307C of the *Corporations Act 2001* is set out on page 5.

This report is made in accordance with a resolution of the directors.

1 General information

The financial statements cover Russell Investments Global Opportunities Fund (the “Fund”) as an individual entity. The Fund was constituted on 12 October 2004. The Fund will terminate on 11 October 2084 unless terminated earlier in accordance with the provisions of the Fund’s constitution.

The responsible entity of the Fund is Russell Investment Management Ltd (the “responsible entity”). The responsible entity’s registered office is Level 28, 85 Castlereagh Street, Sydney, NSW 2000. The financial statements are presented in the Australian currency.

The Fund invests predominantly in a broad range of international shares listed on stock exchanges in developed and emerging international markets. The Fund may also engage in the use of derivatives as set out in the Fund’s governing documents and in accordance with the provisions of the Fund’s constitution.

The financial statements were authorised for issue by the directors of the responsible entity on 22 September 2021. The directors of the responsible entity have the power to amend and reissue the financial statements.

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all year presented, unless otherwise stated in the following text.

(a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) and the *Corporations Act 2001* in Australia. The Fund is a for-profit fund for the purpose of preparing the financial statements.

The financial statements are prepared on the basis of fair value measurement of assets and liabilities except where otherwise stated.

The statement of financial position is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current. All balances are expected to be recovered or settled within twelve months, except for investments in financial assets and liabilities and net assets attributable to unitholders.

The Fund manages financial assets at fair value through profit or loss based on the economic circumstances at any given point in time, as well as to meet any liquidity requirements. As such, it is expected that a portion of the portfolio will be realised within twelve months, however, an estimate of that amount cannot be determined as at reporting date.

Compliance with International Financial Reporting Standards (IFRS)

The financial statements of the Fund also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board.

New and amended accounting standards adopted by the Fund

There are no standards, interpretations or amendments to existing standards that are effective for the first time for the financial year beginning 1 July 2020 that have a material impact on the amounts recognised in the prior periods or will affect the current or future periods.

New accounting standards, amendments and interpretations effective after 1 July 2021 and have not been early adopted

A number of new accounting standards, amendments to standards and interpretations are effective for annual periods beginning after 1 July 2021, and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Fund.

2 Summary of significant accounting policies (continued)

(b) Financial assets and liabilities at fair value through profit or loss

(i) Classification

Assets

The Fund classifies its investments based on its business model for managing those financial assets and the contractual cash flow characteristics. The Fund's portfolio of financial assets is managed and performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy. The Fund's policy is for the responsible entity to evaluate the information about these financial assets on a fair value basis together with other related financial information.

For equity securities, unit trusts and derivatives, the contractual cash flows of these instruments do not represent solely payments of principal and interest. Consequently, these investments are measured at fair value through profit or loss.

For debt securities, the contractual cash flows are solely payments of principal and interest, however they are neither held for collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, the debt securities are measured at fair value through profit or loss.

Liabilities

Derivative contracts that have a negative fair value are presented as financial liabilities at fair value through profit or loss.

(ii) Recognition and derecognition

The Fund recognises financial assets and financial liabilities on the date it becomes party to the contractual agreement (trade date) and recognises changes in fair value of the financial assets or financial liabilities from this date.

Investments are derecognised when the right to receive cash flows from the investments have expired or the Fund has transferred substantially all risks and rewards of ownership.

(iii) Measurement

At initial recognition, the Fund measures financial assets and financial liabilities at fair value. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in the statement of comprehensive income.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the statement of comprehensive income within 'net gains/(losses) on financial instruments at fair value through profit or loss' in the period in which they arise.

For further details on how the fair values of financial instruments are determined see note 5 to the financial statements.

(iv) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. Refer to note 4 to the financial statements for further information.

(c) Net assets attributable to unitholders

Units are redeemable at the unitholders' option, however, applications and redemptions may be suspended by the responsible entity if it is in the best interests of the unitholders.

The units can be put back to the Fund at any time for cash or in specie based on the redemption price, which is equal to a proportionate share of the Fund's net asset value attributable to the unitholders.

2 Summary of significant accounting policies (continued)

(c) Net assets attributable to unitholders (continued)

The units are carried at the redemption amount that is payable at balance sheet date if the holder exercises the right to put the unit back to the Fund. This amount represents the expected cash flows on redemption of these units.

Under AASB 132 *Financial Instruments: Presentation*, puttable financial instruments are classified as equity where certain strict criteria are met. The Fund classifies the net assets attributable to unit holders as liabilities as they do not satisfy all the criteria.

(d) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments with original maturities of three months or less from the date of acquisition that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Payments and receipts relating to the purchase and sale of investment securities are classified as cash flows from operating activities, as movements in the fair value of these securities represent the Fund's main income generating activity.

(e) Deposits held with broker for margin

Margin accounts comprise cash held as collateral for derivative transactions. The cash is held by the broker and is only available to meet margin calls. It is not included as a component of cash and cash equivalents.

(f) Investment income

Interest income from financial assets at amortised cost is recognised on a time-proportionate basis using the effective interest method and includes interest from cash and cash equivalents.

Dividend and distribution income from financial assets at fair value through profit or loss is recognised in the statement of comprehensive income within distribution income when the Fund's right to receive payments is established.

Other changes in fair value for such instruments are recorded in accordance with the policies described in note 2(b) to the financial statements.

(g) Expenses

All expenses, including responsible entity's fees, management fees and custodian fees, are recognised in the statement of comprehensive income on an accruals basis. The responsible entity is entitled under the Fund's constitution to be reimbursed for certain expenses incurred in administering the Fund.

(h) Income tax

Under current legislation, the Fund is not subject to income tax provided it attributes the entirety of its taxable income to its unitholders.

In the event that the Fund incurs withholding taxes imposed by certain countries on investment income and capital gains, such income or gains are recorded gross of withholding taxes in the statement of comprehensive income. Withholding taxes are included in the statement of comprehensive income.

(i) Distributions to unitholders

Distributions are payable as set out in the Fund's product disclosure statement and/or Fund's constitution. Such distributions are recognised as payable when they are determined by the responsible entity of the Fund.

2 Summary of significant accounting policies (continued)

(j) Increase/(decrease) in net assets attributable to unitholders

Income not distributed is included in net assets attributable to unitholders. Movements in net assets attributable to unitholders are recognised in the statement of comprehensive income as finance costs.

(k) Foreign currency translation

(i) Functional and presentation currency

Items included in the Fund's financial statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). This is the Australian Dollar, which reflects the currency of the economy in which the Fund competes for funds and is regulated. The Australian Dollar is also the Fund's presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translations at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income in net foreign exchange gains/(losses).

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when fair value was determined. Translation differences on assets and liabilities carried at fair value are reported in the statement of comprehensive income on a net basis within net gains/(losses) on financial instruments at fair value through profit or loss.

(l) Balances due from/to brokers

Amounts due from/to brokers represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet delivered by the end of the year. The due from brokers balance is held for collection and consequently measured at amortised cost.

(m) Receivables

Receivables may include amounts for dividends, interest and unit trust distributions. Dividends and unit trust distributions are accrued when the right to receive payment is established. Interest is accrued at the end of each reporting period from the time of last payment in accordance with the policy set out in note 2(f) above. Amounts are generally received within 30 days of being recorded as receivables.

These amounts are recognised initially at fair value and subsequently measured at amortised cost. At each reporting date, the Fund shall measure the loss allowance on receivables at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Fund shall measure the loss allowance at an amount equal to 12-month expected credit losses. Significant financial difficulties of the counterparty, probability that the counterparty will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required. If the credit risk increases to the point that it is considered to be credit impaired, interest income will be calculated based on the gross carrying amount adjusted for the loss allowance. A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due. Any contractual payment which is more than 90 days past due is considered credit impaired.

The amount of the impairment loss is recognised in profit or loss within other expenses. When a trade receivable for which an impairment allowance had been recognised becomes uncollectible in a subsequent period, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against other expenses in profit or loss.

2 Summary of significant accounting policies (continued)

(n) Payables

Payables include liabilities and accrued expenses owing by the Fund which are unpaid as at the end of the reporting period.

(o) Applications and redemptions

Applications received for units in the Fund are recorded net of any entry fees payable prior to the issue of units in the Fund. Redemptions from the Fund are recorded gross of any exit fees payable after the cancellation of units redeemed.

(p) Goods and Services Tax (GST)

The GST incurred on the costs of various services provided to the Fund by third parties such as custodial services and investment management fees have been passed onto the Fund. The Fund qualifies for Reduced Input Tax Credits (RITC) at a rate of at least 55% or 75%; hence investment management fees, custodial fees and other expenses have been recognised in the statement of comprehensive income net of the amount of GST recoverable from the Australian Taxation Office (ATO). Accounts payable are inclusive of GST. The net amount of GST recoverable from the ATO is included in receivables in the statement of financial position. Cash flows relating to GST are included in the statement of cash flows on a gross basis.

(q) Use of estimates

The Fund makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

For the majority of the Fund's financial instruments, quoted market prices are readily available. However, certain financial instruments, for example over-the-counter derivatives or unquoted securities, are fair valued using valuation techniques. Where valuation techniques (for example, pricing models) are used to determine fair values, they are validated and periodically reviewed by experienced personnel of the responsible entity, independent of the area that created them.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

For more information on credit risk and how fair value is calculated see note 3 and note 5 to the financial statements.

(r) Rounding of amounts

Amounts in the financial statements have been rounded to the nearest thousand dollars in accordance with *Australian Securities & Investments Commission ("ASIC") Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191*, unless otherwise indicated.

3 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including price risk, foreign exchange risk and interest rate risk), credit risk and liquidity risk.

The Fund's overall risk management process focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Fund's financial performance. The Fund combines managers with varied investment styles to achieve returns in a broad range of market conditions and to manage exposure to risk through diversification.

The Fund's multi-manager process differentiates it from single-manager funds. The Fund's investment managers have non-discretionary asset management assignments pursuant to which they provide a model portfolio to Russell Investment Management Ltd representing their investment recommendations, based upon which Russell Investment Management Ltd,

3 Financial risk management (continued)

purchases and sells securities for the Fund. For fund assets not allocated to investment manager strategies, Russell Investment Management Ltd utilises quantitative and/or rules-based processes and qualitative analysis to assess fund characteristics and invest in securities and instruments which provide the desired exposures.

As a manager of managers, the Fund delegates some of the management of its funds to external investment managers. The risk management process operates at a number of levels. In addition to monitoring investment activity and exposure at the point of execution by an investment manager, Russell Investment Management Ltd oversees and monitors the overall level of risk in the Fund.

(a) Market risk

(i) Price risk

The Fund is exposed to equity securities, unit trusts and derivative securities price risk. This arises from investments held by the Fund for which prices in the future are uncertain. Where non-monetary financial instruments are denominated in currencies other than the Australian Dollar, the price in the future will also fluctuate because of changes in foreign exchange rates. Paragraph (ii) 'Foreign exchange risk' below sets out how this component of price risk is managed and measured. They are classified on the statement of financial position as financial assets and liabilities at fair value through profit or loss. All securities investments present a risk of loss of capital.

Russell Investment Management Ltd moderates this risk by diversifying the management of its assets by allocating them between one or more investment managers. The Fund's investment managers monitor their model portfolio holdings on a daily basis. Russell Investment Management Ltd will monitor the Fund's characteristics in detail with the investment managers regularly. Russell Investment Management Ltd also reviews the Fund's portfolio characteristics in its entirety such as country allocations, capitalisation, industry sector weights, price/book levels, currency exposure, and quality exposure and other key risk measures.

The table on page 18 summarises the impact of an increase/decrease on the Fund's net assets attributable to unitholders at 30 June 2021. The analysis is based on the assumptions that the underlying investments increased/decreased by 10% (2020: 12%) with all other variables held constant. The impact mainly arises from the possible change in the fair value of listed equities, unit trusts and equity derivatives.

(ii) Foreign exchange risk

The Fund holds assets denominated in currencies other than the Australian Dollar, the functional currency. It is therefore exposed to currency risk, as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates.

The Fund may utilise financial instruments to hedge against fluctuations in the relative values of their portfolio positions in addition to making active currency selections.

The Fund delegates some of the foreign exchange risk management to external investment managers. In addition, Russell Investment Management Ltd also oversees and monitors the foreign exchange risk of the Fund.

3 Financial risk management (continued)

(a) Market risk (continued)

(ii) Foreign exchange risk (continued)

The table on page 18 summarises the sensitivities of the Fund's monetary assets and liabilities to foreign exchange risk. The analysis is based on the assumption that the Australian Dollar weakened/strengthened by 12% (2020: 12%) against other currencies to which the Fund is significantly exposed. The impact arises mainly from exposure to accounts denominated in US Dollars, JPY or GBP (2020: US Dollars, JPY or GBP).

The Fund's foreign exchange exposure on investment in unit trusts and equities is embedded in the price risk as presented on page 18 and therefore these investments are not included in the foreign exchange risk sensitivity analysis.

(iii) Cash flow and fair value interest rate risk

The majority of the Fund's financial assets and liabilities are non-interest bearing or have a very short time to maturity. As a result, the Fund is not subject to significant risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short term market interest rates.

The table below summarises the Fund's exposure to interest rate risk. It includes the Fund's assets and liabilities at fair values, categorised by the earlier of contractual re-pricing or maturity dates.

(b) Summarised sensitivity analysis

The following table summarises the sensitivity of the Fund's operating profit and net assets attributable to unitholders to price risk and foreign exchange risk. The reasonably possible movements in the risk variables have been determined based on management's best estimate, having regard to a number of factors, including historical levels of changes in foreign exchange rates, historical correlation of the Fund's investments with the relevant benchmark and market volatility. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of the economies, markets and securities in which the Fund invests. As a result, historic variations in risk variables are not a definitive indicator of future variations in the risk variables.

	Price risk		Foreign exchange risk					
	Impact on operating profit/net assets attributable to unitholders							
	-10%	+10%	-12%	+12%	-12%	+12%	-12%	+12%
	\$'000	\$'000	USD \$'000	USD \$'000	JPY \$'000	JPY \$'000	GBP \$'000	GBP \$'000
30 June 2021	(241,039)	241,039	(40,304)	40,304	16,507	(16,507)	21,771	(21,771)
30 June 2020	(346,575)	346,575	(68,133)	68,133	9,568	(9,568)	26,455	(26,455)

The sensitivity factors for 30 June 2020 were +/-12% for price risk and +/-12% for foreign exchange risk.

Some limitations of the sensitivity analysis above are:

1. The models are based on historical data and cannot take account of the fact that future market movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;

3 Financial risk management (continued)

(b) Summarised sensitivity analysis (continued)

2. The market risk information is a relative estimate of risk rather than a precise and accurate number; and
3. The market information represents a hypothetical outcome and is not intended to be predictive; and future market conditions could vary significantly from those experienced in the past.

(c) Credit risk

The Fund is exposed to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when they fall due.

The Fund's main credit risk concentrations arise from trading equity and financial derivative instruments. Other credit risk arises from cash and cash equivalents, deposits with banks and other financial institutions, receivables and amounts due from brokers. None of these assets are impaired nor past due but not impaired.

The maximum exposure to credit risk at the reporting date is the carrying amount of the financial assets.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

At the reporting date the exposure to credit risk for cash and cash equivalents, deposits with banks and amounts due from brokers is considered low as majority counterparties of the Fund have a rating of investment grade or higher (as determined by external credit rating agencies). Periodic monitoring and an annual credit review are performed on the custodian by a credit research team. This review may include as appropriate an assessment of the custodian's liquidity position, income streams, asset quality and credit ratings.

The clearing and depository operations for the Fund's security transactions are mainly concentrated with one counterparty, namely State Street Australia Limited. At 30 June 2021, State Street Australia Limited had a credit rating of Aa1 (2020: Aa1). At 30 June 2021, substantially all cash and investments are held in custody by State Street Australia Limited or through a sub-custodian.

(d) Liquidity risk

The Fund is exposed to daily cash redemptions of redeemable units. The liquidity risks associated with the need to satisfy unitholders' requests for redemptions are primarily mitigated by maintaining a pool of cash to satisfy usual levels of demand. In addition, the Fund may restrict redemptions on a temporary basis in line with the provisions of the Fund's governing documents.

The Fund primarily holds investments that are traded in an active market and can be readily disposed. However it may invest in derivative contracts and fixed income securities that are traded over the counter or on secondary markets. These markets may be illiquid and as a result, the Fund may not be able to quickly liquidate its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as deterioration in the creditworthiness of any particular issuer or counterparty. Refer to note 5 for the type of financial instruments held by the Fund.

The Fund delegates some of liquidity risk management to external investment managers who monitor their model liquidity positions on a regular basis. In addition, Russell Investment Management Ltd monitors the Fund's liquidity position on a daily basis.

(i) Maturities of non-derivative financial liabilities

The table below analyses the Fund's non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the end of the reporting period to the contractual maturity date. The amounts in the table are contractual undiscounted cash flows. Units are redeemed on demand at the unitholder's option. However, the board of the responsible entity does not envisage that the contractual maturity disclosed in the table below will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

4 Offsetting financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The gross and net positions of financial assets and liabilities that have been offset in the statement of financial position are disclosed in the first three columns of the tables below.

Total	7,486	(1,746)	5,740	(5,354)	-	386

(i) Master netting arrangement – not currently enforceable

Agreements with derivative counterparties are based on the ISDA Master Agreement. Under the terms of these arrangements, only where certain credit events occur (such as default), the net position owing/receivable to a single counterparty in the same currency will be taken as owing and all the relevant arrangements terminated. As the Fund does not presently have a legally enforceable right of set-off, these amounts have not been offset in the statement of financial position, but have been presented separately in the above table.

5 Fair value measurement

The Fund measures and recognises the following assets and liabilities at fair value on a recurring basis:

- Financial assets / liabilities at fair value through profit or loss (FVTPL) (see note 7 and note 8)
- Derivative financial instruments (see note 9)

The Fund has no assets or liabilities measured at fair value on a non-recurring basis in the current reporting period.

AASB 13 Fair Value Measurement requires disclosure of fair value measurements by level of the following fair value hierarchy:

- quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly (level 2); or
- inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

(i) Fair value in an active market (level 1)

The Fund values its investments in accordance with the accounting policies set out in note 2. For the majority of its investments, the Fund relies on information provided by independent pricing services for the valuation of its investments.

5 Fair value measurement (continued)

(i) Fair value in an active market (level 1) (continued)

The quoted market prices used for both financial assets and financial liabilities were last traded prices other than exchange traded futures, which are valued at the market closing price.

(ii) Valuation techniques used to derive level 2 and level 3 fair value

The fair value of financial assets and liabilities that are not traded in an active market are determined by using quoted market prices, dealer quotes and/or valuation techniques.

Forward currency contracts are valued using quoted exchange rates and yield curves derived from quoted interest rates matching maturities of the contracts as at the valuation date.

Recognised fair value measurements

The following table presents the Fund's assets and liabilities measured and recognised at fair value through profit or loss across the fair value hierarchy.

Total	4,342	1,398	-	5,740

The Fund's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

5 Fair value measurement (continued)

(i) Transfers between levels

There were no transfers between levels for the year ended 30 June 2021 and year ended 30 June 2020. There were also no changes made to any of the valuation techniques applied as of 30 June 2020.

(ii) Fair value measurements using significant unobservable inputs (level 3)

The following table presents the movement in level 3 instruments for the year ended 30 June 2021:

Closing balance	<u>3,566</u>
*includes unrealised gains/(losses) recognised in the statement of comprehensive income attributable to balances held at the end of the reporting period	<u>(212)</u>

(iii) Valuation processes

Portfolio reviews are undertaken regularly by management to identify securities that potentially may not be actively traded or have stale security pricing. This process identifies securities which could be regarded as being level 2 or level 3 securities.

Further analysis, should it be required, is undertaken to determine the accounting significance of the identification. For certain security types, in selecting the most appropriate valuation model, management performs back testing and considers actual market transactions. Changes in allocation to or from level 3 are analysed at the end of each reporting period.

(iv) Fair values of other financial instruments

The Fund has assets and liabilities carried at amortised cost. Due to their short-term nature, their carrying values are a reasonable approximation of fair value.

9 Derivative financial instruments

In the normal course of business the Fund enters into transactions in various derivative financial instruments which have certain risks. A derivative is a financial instrument or other contract which is settled at a future date and whose value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating, credit index or other variable.

Derivative financial instruments require no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.

Derivative transactions include many different instruments, such as forwards, futures, options and swaps. Derivatives are considered to be part of the investment process and the use of derivatives is an essential part of the Fund's portfolio management. Derivatives are not managed in isolation. Consequently, the use of derivatives is multifaceted and includes:

- hedging to protect an asset or liability of the Fund against a fluctuation in market values or to reduce volatility;
- a substitution for trading of physical securities; and
- adjusting asset exposures within the parameters set in the investment strategy, and adjusting the duration of fixed interest portfolios or the weighted average maturity of cash portfolios.

The Fund holds the following derivative instruments:

(a) Futures

Futures are contractual obligations to buy or sell financial instruments on a future date at a specified price established in an organised market. The futures contracts are collateralized by cash or marketable securities. Changes in futures contracts' values are usually settled net daily with the exchange. Interest rate futures are contractual obligations to receive or pay a net amount based on changes in interest rates at a future date at a specified price, established in an organised financial market.

9 Derivative financial instruments (continued)

(b) Foreign currency contracts

Foreign currency contracts are primarily used by the Fund to hedge against foreign currency exchange rate risk on its non-Australian Dollar denominated trading securities. The Fund agrees to receive or deliver a fixed quantity of foreign currency for an agreed upon price on an agreed future date. Foreign currency contracts are valued at the prevailing bid price at the end of each reporting period. The Fund recognises a gain or loss equal to the change in fair value at the end of each reporting period.

(c) Warrants

Warrants are options to purchase additional securities from the issuer at a specified price during a specified period. Warrants are valued at the prevailing market price at the end of each reporting period. The Fund recognises a gain or loss equal to the change in fair value at the end of each reporting period.

The Fund's derivative financial instruments at year end are detailed below. In the table below, foreign currency contracts have been presented on a net notional basis. All other derivative contract notionals have been presented on a gross basis. For more information on the net exposure of these derivatives see note 3 to the financial statements.

	<u>1,454,007</u>	<u>31,072</u>	<u>5,740</u>

An overview of the risk exposures and fair value measurements relating to derivatives is included in note 3 and note 5 to the financial statements.

As at the reporting date, the Fund largely hedged its transactions or positions by holding foreign currency contracts with a gross notional value of \$907,394,151 (2020: \$1,104,735,566) comprising of buy \$480,819,822 (2020: \$661,460,453) and sell \$426,574,329 (2020: \$443,275,113) resulting in net exposure of \$54,245,493 (2020: \$218,185,340).

10 Structured entities

A structured entity is an entity in which voting or similar rights are not the dominant factor in deciding control. Structured entities are generally created to achieve a narrow and well defined objective with restrictions around their ongoing activities. Depending on the Fund's power over the activities of the entity and its exposure to and ability to influence its own returns, it may control the entity. However, the Fund applies the Investment Entity Exception available under AASB 10 *Consolidated Financial Statements* and therefore does not consolidate its controlled entities. In other cases, it may have exposure to such an entity but not control it.

An interest in a structured entity is any form of contractual or non-contractual involvement which creates variability in returns arising from the performance of the entity for the Fund. Such interests include holdings of units in unlisted trusts.

The nature and extent of the Fund's interests in related structured entities are summarised in notes 7 and 16.

The Fund has exposures to unconsolidated structured entities through its investment activities. The Fund's maximum exposure to loss is restricted to the carrying value of the asset.

The Fund's overall risk management program focuses on ensuring compliance with its governing documents and seeks to maximise the returns derived for the level of risk to which the Fund is exposed. The risks associated with the investments are referred to in note 3.

During the year the Fund did not provide financial support to unconsolidated structured entities and has no intention of providing financial or other support. The Fund's investment strategy entails investments in other funds on a regular basis. The Fund intends to continue investing in other funds.

As at 30 June 2021, there were no capital commitment obligations other than what is in unsettled sales or unsettled purchases in the balance sheet (2020: \$Nil).

As stipulated within the Fund's constitution, each unit represents a right to an individual share in the Fund and does not extend to a right to the underlying assets of the Fund.

There are three separate classes of units. Each unit within the same class has the same rights as all other units within that class. Except for different management fee rates, the three different classes have the same preferences and restrictions. Refer to note 16 for the applicable management fee rates.

Capital risk management

Management considers its net assets attributable to unitholders as capital, notwithstanding net assets attributable to unitholders are classified as a liability. The amount of net assets attributable to unitholders can change significantly on a daily basis as the Fund is subject to daily applications and redemptions at the discretion of unitholders.

Daily applications and redemptions are reviewed relative to the liquidity of the Fund's underlying assets on a daily basis by the responsible entity. Under the terms of the Fund's constitution, the responsible entity has the discretion to reject an application for units and to defer or adjust a redemption of units if the exercise of such discretion is in the best interests of unitholders. The Fund did not restrict or reject any redemptions in the financial year.

16 Related party transactions

Responsible entity

Russell Investment Management Ltd (ABN 53 068 338 974), the responsible entity and manager of the Fund, is a wholly owned subsidiary of Russell Investment Group Pty Ltd (Australia).

The responsible entity is engaged in the business of providing investment management and administrative services on behalf of the Fund. It has appointed State Street Australia Limited to perform custody and certain administrative functions. To implement the multi-asset, multi-style, multi-manager diversification technique in relation to the Fund, the responsible entity will: (i) engage and, where necessary, replace the investment managers for the Fund; (ii) allocate assets among investment managers within the Fund; and (iii) monitor each investment manager's overall investment performance. For services rendered, the Fund pays the responsible entity a fee as discussed below.

The responsible entity retains the right under the terms of its agreements with the investment managers to direct them, subject to a requirement of best execution, to execute transactions that enable it to purchase brokerage and research services that assist in the provision of investment services to the responsible entity and are in the best interests of the unitholders. In addition, the investment managers may elect to purchase research services for their own benefit, subject to the best execution requirement. Brokerage and research services include (1) fundamental market research including performance characteristics of asset classes, investment styles, and allocation strategies; (2) advice either directly or indirectly through publications or writings as to the value of securities, the advisability of investing in, purchasing or selling securities and the availability of securities or of purchasers or sellers of securities; (3) analysis and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy and the performance of accounts; and (4) effecting securities transactions and performing functions incidental thereto (such as clearance and settlement) or that are required in connection therewith.

The responsible entity has received the following goods and services from brokers and dealers generally over the period of these accounts:

- written and oral research reports from brokers or dealers;
- computer based financial analytical systems, together with their associated software and servicing support; and
- statistical analysis relating to markets, companies, industries, business and economic factors, market trends and portfolio strategies.

Brokerage commissions

The Fund may effect portfolio transactions through an affiliate of the responsible entity, when an investment manager determines that a Fund will receive competitive execution, price, and commissions. Amounts retained by affiliates of the responsible entity for the year ended 30 June 2021 were \$1,349,018 (2020: \$2,044,384).

Additionally, the Fund paid brokerage commissions to non-affiliated brokers who provided brokerage and research services to the responsible entity.

Liability limited by a scheme approved under Professional Standards Legislation.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors of the Responsible Entity for the financial report

The directors of the Responsible Entity are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors of the Responsible Entity determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors of the Responsible Entity are responsible for assessing the ability of the Fund to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors of the Responsible Entity either intend to liquidate the Fund or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at:
