Review and results of operations

During the half-year, the Fund continued to invest in accordance with its investment objective and investment strategy as set out in the offer documents of the Fund and in accordance with the provisions of the Fund's constitution.

The Fund generally invests in the securities comprising the Index in proportion to their relative weightings and aims to achieve investment returns (before costs and tax), that closely correspond to the performance of the Index.

Results

The performance of the Fund, as represented by the results of its operations, was as follows:

	Half-year ended	
	31 December 2019	31 December 2018
Operating profit/(loss) before finance costs attributable to unitholders (\$'000)	<u>15</u>	<u>2,143</u>

The movement in the assets and liabilities in the statement of financial position corresponds with the units issued and redeemed during the half-year as reflected in note 4 and the performance of the Fund during the half-year.

Directors' report (continued)

Significant changes in state of affairs

In the opinion of the directors, there were no significant changes in the state of affairs of the Fund that occurred during the financial half-year.

Likely developments and expected results of operations

The Fund will continue to be managed in accordance with the investment objectives and guidelines as set out in the offer documents of the Fund and in accordance with the provisions of the Fund's constitution.

The results of the Fund's operations will be affected by a number of factors, including the performance of investment markets in which the Fund invests. Investment performance is not guaranteed and future returns may differ from past returns. As investment conditions change over time, past returns should not be used to predict future returns.

The Fund's investment objective and strategy remains unchanged which is to track the performance of the Index (before fees and costs). Accordingly the future returns of the Fund are dependent on the performance of the Index.

1 Basis of preparation of interim report

These condensed financial statements for the half-year ended 31 December 2019 has been prepared in accordance with the *Corporations Act 2001* and Australian Accounting Standard AASB 134 *Interim Financial Reporting*.

These interim financial statements cover Russell Investments Australian Government Bond ETF (the "Fund") as an individual entity. The Fund was constituted on 1 December 2011 and will terminate on 30 November 2091 unless terminated earlier in accordance with the provisions of the Fund's constitution.

These interim financial statements do not include all the notes of the type normally included in an annual financial report. Accordingly, these interim financial statements are to be read in conjunction with the annual financial report for the year ended 30 June 2019 and any public announcements made in respect of Russell Investments Australian Government Bond ETF during the interim reporting period.

The responsible entity of the Fund is Russell Investment Management Ltd (the "responsible entity"). The responsible entity's registered office is Level 29, 135 King Street, Sydney, NSW 2000. The interim financial statements are presented in Australian currency.

The Fund seeks to track the performance of the DBIQ 5-10 year Australian Government Bond Index (the "Index") by investing predominantly in Australian Government fixed income securities. The Index filters the largest and most liquid Commonwealth Government fixed income securities and weights them equally upon reconstitution. Derivatives may also be used to a limited extent to obtain or reduce exposure to such securities.

The Fund is organised into one main segment which operates solely in the business of investment management within Australia. The Fund operates in Australia and holds investments in Australia.

The nature of the Fund's operation is such that income and expenses are incurred in a manner which is not impacted by any form of seasonality.

The interim financial statements were authorised for issue by the directors on 10 March 2020. The directors of the responsible entity have the power to amend and reissue the interim financial statements.

(a) Significant accounting policies

The accounting policies in these interim financial statements are the same as those applied in the Fund's financial statements for the year ended 30 June 2019.

2 Fair value measurement

The Fund measures and recognises the following assets at fair value on a recurring basis:

- Financial assets at fair value through profit or loss (FVTPL) (see note 3)

The Fund has no assets or liabilities measured at fair value on a non-recurring basis in the current reporting period.

AASB 13 Fair Value Measurement requires disclosure of fair value measurements by level of the following fair value hierarchy:

- (a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- (b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly (level 2); and
- (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

(i) Fair value in an active market (level 1)

The fair value of financial assets and liabilities traded in active markets is based on their quoted market prices at the end of the reporting period without any deduction for estimated future selling costs.

2 Fair value measurement (continued)

(i) Fair value in an active market (level 1) (continued)

The Fund values its investments in accordance with the accounting policies set out in notes to the financial statements as at 30 June 2019. For the majority of its investments, the Fund relies on information provided by independent pricing services for the valuation of its investments.

The quoted market prices used for both financial assets and financial liabilities were last traded prices.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

(ii) Valuation techniques used to derive level 2 and level 3 fair value

The fair value of financial assets and liabilities that are not exchange-traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, reference to the current fair value of a substantially similar other instrument, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the end of the reporting period applicable for an instrument with similar terms and conditions.

For other pricing models, inputs are based on market data at the end of the reporting period. Fair values for unquoted equity investments are estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer.

The fair value of derivatives that are not exchange traded is estimated at the amount that the Fund would receive or pay to terminate the contract at the end of the reporting period taking into account current market conditions (volatility and appropriate yield curve) and the current creditworthiness of the counterparties. The fair value of a forward contract is determined as a net present value of estimated future cash flows, discounted at appropriate market rates as at the valuation date.

Investments in other unlisted unit trusts are recorded at the redemption value per unit as reported by the investment managers of such funds.

Recognised fair value measurements

The following table presents the Fund's assets and liabilities measured and recognised at fair value as at 31 December 2019 and 30 June 2019.

As at 31 December 2019	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000

Recognised fair value measurements (continued)

Financial assets at fair value through profit or loss:				
Debt securities	-	71,228	-	71,228
Total	-	71,228	-	71,228

The Fund's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

(i) Transfers between levels

There were no transfers between levels for the half-year ended 31 December 2019 and full-year ended 30 June 2019. There were also no changes made to any of the valuation techniques applied as of 30 June 2019.

(ii) Fair value measurements using significant unobservable inputs (level 3)

The Fund did not hold any financial instruments with fair value measurements using significant unobservable inputs during the half-year ended 31 December 2019 or year ended 30 June 2019.

(iii) Valuation processes

Portfolio reviews are undertaken regularly by management to identify securities that potentially may not be actively traded or have stale security pricing. This process identifies securities which possibly could be regarded as being level 3 securities.

Further analysis, should it be required, is undertaken to determine the accounting significance of the identification. For certain security types, in selecting the most appropriate valuation model, management performs back testing and considers actual market transactions. Changes in allocation to or from level 3 are analysed at the end of each reporting period.

(iv) Fair values of other financial instruments

The Fund has assets and liabilities carried at amortised cost. Due to their short-term nature, their carrying values are a reasonable approximation of fair value.
