2. How super works

Superannuation is a long-term, partly compulsory way of saving for your retirement. There are different types of contributions available (for example, compulsory contributions by your employer, voluntary personal contributions that you choose to make and Government co-contributions). There are limitations on contributions you can make to your superannuation and restrictions on when you can make withdrawals from superannuation. Tax benefits are provided by the Government to encourage you to save more for retirement. Most people have the right to choose which superannuation entity their employer should direct their compulsory employer contributions into. These are known as Superannuation Guarantee (SG) contributions.

In Australia, superannuation investments receive special tax concessions that aren't available to other types of investments. That's why superannuation is such a powerful vehicle to save for retirement. As your superannuation is likely to be one of your biggest assets in retirement, the choices you make today could significantly impact your lifestyle in retirement.

You should read the important information about 'How super works' before making a decision. Go to nationwidesuper.com.au/superguide and read the Super Guide. This material relating to 'How super works' may change between the time when you read this PDS and the day when you acquire the product.

3. Benefits of investing with Nationwide Super

Any fees, tax and negative investment earnings are debited from your account. 4. Risks of Super

All investments carry risk. It's the trade-off for the return that investors seek. Different strategies (such as the investment options described in section 5 of this PDS) may carry different levels of risk, depending on the assets that make up the strategy. Assets with higher expected long-term returns generally carry the highest level of short-term risk. For example, shares and commodities have relatively higher risk and higher expected returns than fixed interest and cash.

What you should consider:

- the value of your investments will vary and the level of returns will vary depending on the options you are invested in.
- · returns are not guaranteed and may result in a loss.
- past returns are not a reliable indicator of future returns.
- superannuation and taxation laws affecting your super may change in the future.
- the amount of your future superannuation savings (including contributions and returns) may not be enough to provide adequately for your retirement.
- the level of risk varies for each person how you invest your super will depend on a range of factors including your age, your investment timeframes, other investments you may have and your tolerance for risk.

You should read the important information about the 'Risks of Super' before making a decision. Go to nationwidesuper.com.au/investmentguide and read the Investment Guide.

This material relating to the 'Risks of Super' may change between the time when you read this PDS and the day when you acquire the product.

5. How we invest your money

For Nationwide Super – Employer members, you'll be invested in the GoalTracker (MySuper) investment option, unless you make an investment choice. For Nationwide -Personal members you will need to make an investment choice when you join. The GoalTracker investment option automatically invests your super based on your age, through a diversified portfolio invested across a range of asset classes. When you're younger, your investment strategy will have a higher allocation to growth assets to help grow your super balance. To help protect your savings as you approach retirement, your allocation to defensive assets will increase. Refer to the table below. By telling us more, you can then opt for GoalTracker Plus to create and manage a tailored investment strategy just for you.

6. Fees and costs

Did you know?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns. For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30-year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs. You or your employer, as applicable, may be able to negotiate to pay lower fees. Ask the Fund or your financial adviser.

To find out more

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)**Moneysmart website (www.moneysmart.gov.au) has a superannuation calculator to help you check out different fee options.

Note: The Moneysmart calculator can be used to calculate the effect of fees and costs on account balances.

The information in this Fees and Costs Summary can be used to compare costs between different superannuation products. Fees and costs can be paid directly from your account or can be deducted from investment returns. Taxes and insurance costs are set out in another part of this document.

Any amount charged in excess of that cap must be refunded.
- Δ The maximum total asset based administration fee charged by the Fund administrator is 0.21% per year. However, the maximum total asset based administration amount deducted from your account is 0.20% per year as the Trustee pays 0.01% per year of this fee from the Fund Reserve.
- 2. The asset based administration fee applies to the first \$1 million of your total account balance and will depend on the investment option you are invested in. This fee may be charged in two parts and show as separate transactions in your account. Please refer to the 'Additional explanation of fees and costs' section of your Insurance, Fees and Costs Guide for further information on how the cap applies.
- 3. AWOTE means Average Weekly Ordinary Times Earnings.

Changes in fees

The Trustee has the right to change fees at any time without your consent. The fixed-dollar administration fee is automatically indexed to Average Weekly Ordinary Time Earnings (AWOTE) each year on 1 October. Any material increase in the fees you are charged will be communicated to you at least 30 days before they are charged.

Example of annual fees and costs for the superannuation product

This table gives an example of how the ongoing annual fees and costs for the GoalTracker option for this superannuation product can affect your superannuation investment over a 1-year period. You should use this table to compare this superannuation product with other superannuation products.

EXAMPLE: GOALTRACKER IN	/ESTMENT OPTION	BALANCE OF \$50,000
Administration fees and costs	0.17% per year Plus \$60.00 per year Plus 0.00% (paid from the Fund reserve) ¹	For every \$50,000 you have in the superannuation product, you will be charged or have deducted from your investment \$85.00 in administration fees and costs, plus \$60.00 regardless of your balance
PLUS Investment fees and costs	0.63% per year	And, you will be charged or have deducted from your investment \$315.00 in investment fees and costs
PLUS Transaction costs	0.05% per year	And, you will be charged or have deducted from your investment \$25.00 in transaction costs
EQUALS Cost of product ² :		If your balance was \$50,000, at the beginning of the year, then for that year you will be charged fees and costs of \$485.00 ³ for the superannuation product.

- 1. This reflects the excess administration costs incurred by the Trustee and paid from the Fund reserve in the 2024/2025 financial year, the Trustee incurred additional administration costs (as described in the Fees and Costs table above).
- 2. Additional fees may apply.
- 3. The Trustee passes on the tax deductions it receives so the estimated cost to you would be \$464.75.

7. How super is taxed

Superannuation is one of the most tax-effective ways to save for retirement. Even so, taxation laws are complex and subject to change. To make the most of your superannuation, you might like to consult your accountant or tax adviser for specific details about how you will be taxed. This advice may be particularly useful as you approach retirement and need to decide how and when to withdraw your superannuation.

Contributions

Contributions made by your employer, or by you from your before-tax pay, are called 'Concessional Contributions', and these contributions generally have a 15% contributions tax deducted from them. Any money you transfer into your account from an untaxed source (post 30 June 1983 untaxed component only) is also generally taxed at 15%.

Contributions that you make from your after-tax pay are called 'Non-concessional Contributions', and these contributions are not subject to the contributions tax because you have already paid income tax on that money.

There are (different) limits on Concessional and Non-concessional Contributions. It is very important for you to be aware that there will be negative tax consequences for you if you breach either of these limits.

^ High income earners may pay a further 15% tax. Refer to our fact sheet Understanding how super is taxed.

There are Concessional Contribution and Non-concessional Contribution limits. If these limits are exceeded, there are taxation consequences.

For more information on contribution limits and the co-contribution amount including the current threshold, visit nationwidesuper.com.au/rates

Investment earnings

Investment earnings in superannuation are taxed at a maximum rate of 15%. The effective tax rate on some earnings is lower because of further tax concessions or credits available to the Fund. The investment return we disclose to you is net of tax.

Withdrawals

Tax on withdrawals varies depending on your age, the type of withdrawal, and the ratio of taxable to tax-free components in your account. We withhold appropriate tax from amounts we pay to you. Generally, lump-sum withdrawals are tax-free if you are aged 60 or over.

You should provide us with your Tax File Number (TFN) when you join the Fund. If you or your employer do not provide the Fund with your TFN, all Concessional Contributions will be taxed at the top marginal rate plus Medicare levy and you cannot make after-tax contributions. If you do not provide your TFN to the Fund, tax will be withheld at the top marginal rate plus Medicare levy on the taxable component of any payment made to you.

You should read the important information about 'Fees and costs' before making a decision. Go to nationwidesuper.com.au/ifcguide and read the Insurance, Fees and Costs Guide for Insurance and Administration Fees and Costs. Go to 'Additional explanation of fees and costs' in the Investment Guide at nationwidesuper.com. au/investmentguide for Investment Fees and Costs. Go to 'Additional explanation of fees and costs' and 'How super is Taxed' in the Super Guide at nationwidesuper. com.au/superguide for all other fee information, such as Family Law, Advice Fees and Fee definitions. The materials may change between the time when you read this PDS and the day when you acquire the product.

Tax deductions

The Trustee passes through the tax deductions it receives for certain costs of operating the Fund, including insurance fees, in the following ways:

- Indirectly by keeping them within the Fund for the benefit of all members; or
- 2. Directly to your account through reduced fees.

8. Insurance in your super

For detailed information on the insurance cover available (including any limitation that may apply) refer to the Insurance, Fees and Costs Guide at nationwidesuper.com.au/ifcguide.
