

RI TRANSPARENCY REPORT

2019

Russell Investments

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

OO 11.4 Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

ESG issues are incorporated into our research through our manager evaluation process. Embedding perspectives on how ESG issues have the potential to impact opportunities and risks of manager strategies is at the heart of our approach. Through a combination of investment manager interviews, survey responses, and a quantitative review of their portfolios, Russell Investments manager research analysts are able to determine whether managers appropriately assess the risk and return impacts of ESG issues. Our ESG ranking system is formally incorporated in our manager evaluation process as a separate ESG category ranking both quality and competitive edge.

"Other" includes Private Equity and Commodities investments.

Russell Investments' policy is to incorporate responsible investing in our investment manager evaluation process, our portfolio management, our advisory services, and through implementing proprietary solutions as desired by clients.

Russell Investments' portfolio managers select their active managers from among those ranked highly by our manager research teams. Our portfolio managers are aware of the ESG disaggregated ranks and have metrics on ESG and carbon alongside profile and exposure data for all products they employ. Our favored portfolio implementation is to select our preferred portfolio managers, and, where appropriate, work with them to achieve responsible investing goals. For portfolios where responsible investing is explicitly targeted, portfolio managers will work closely with manager research, quantitative research and subject matter experts to ensure the achievement of these targets.

SG 03.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

Everything Russell Investments does, including the investment process, begins with the client discussion of their overall portfolio to determine return objectives, risk tolerances, and unique constraints. All employees of Russell Investments are required to follow our Global Code of Conduct - developed to protect the interests of our clients by avoiding even the appearance of impropriety. We employ the following practices:

- Independence from the money management community, having no material ownership interest in any external investment managers. We do not charge and will not accept compensation from investment advisors to be included in our manager research database, consulting recommendations, or funds assignments.
- We maintain appropriate firewalls between business units to ensure that manager research does not have access to data that show the extent to which investment managers have business relationships with our other business units.
- We maintain and adhere to conflict of interest policies, processes and controls which include routine evaluations of affiliation status. We may identify instances requiring additional disclosures or processes with respect to investment managers who are or become affiliates in the future and will apprise our clients as appropriate. These affiliated relationships are not a factor in Russell Investments' ranking process.

SG 07.4 Additional information. [Optional]

We have four staff who allocate the majority of their time to ESG activities, more importantly, we leverage an integrated and inclusive approach to our responsible investment activities. By involving representation from various Russell Investment business units across manager research, portfolio management, investment strategy, client facing professionals and business management, we are able to provide a comprehensive approach to address ESG issues. In total, over 35 staff are a critical component to our RI/ESG implementation process and collectively comprise 12-15 FTEs supporting responsible investing.

Department of Commerce (DoC) – Secure Choice Retirement Program – Russell Investments has been a strong partner with the Washington State DoC in the creation and evolution of a state-sponsored retirement program targeting small business employees who's employers do not have retirement programs. The Secure Choice program will fill in the gap by providing low risk retirement investments for many small business employees.

Through our trade associations, SIFMA and ICI, we participate in many meetings with regulators, such as the SEC, CFTC, and many others, as we are dealing with global and domestic investment issues surrounding many issues, including MiFID II, shareholder disclosure modernization, balanced SEC liquidity and capital rules, FSOC rules around non-bank financial institutions that allow for flexibility for large and small firms, margin rule requirements, derivative platform concerns that don't discriminate based on global location, balanced consumer-focused fiduciary rule requirements, cyber currency impacts, and block chain, and Brexit impacts.

US Department of Labor - Fiduciary Rule, Open multiple employer plans

Fiduciary Rule – Russell Investments has been engaged in a supportive role in the efforts by the US Department of Labor's creation of a new rule to define a "fiduciary." This effort has included testimony at DOL hearings in Washington, DC; writing comment letters in support of the efforts to create a new fiduciary rule; and, commenting on specific issues imbedded in proposed rules surrounding Multiple Employer Plans (MEPs).

Money market instruments	Many of the securities we cover have increased their ESG disclosure over the years. Any disclosures made may affect the factors that we use to form our opinion of a particular credit (Profitability, Capital/Balance Sheet, Asset Quality, Liquidity, Management, Strategy, Future Prospects). For example, if a Company has significant contingent liabilities related to a legal or environmental issue our view of their Management Quality, Future Prospects Profitability or other factors could be impacted which ultimately feeds into our overall credit opinion.

SG 18 Voluntary Descriptive General

SG 18.1 Indicate whether any specific features of your approach to responsible investment are particularly innovative.

Yes

SG 18.2 Describe any specific features of your approach to responsible investment that you believe are particularly innovative.

Russell Investments has an extensive manager research database which includes detailed characteristics of the portfolios managed as part of our mandate. This information, combined with stock level ESG data, enables us to research managers globally through an ESG lens, and draw conclusions about a manager's integration of ESG factors, regional differences, and progression over time.

During 2015 we carried out extensive implementation research to develop a carbon exposure methodology to manage a global equity low carbon mandate which the client funded towards the end of that year. This led to a decarbonization 2.0 strategy research paper and implementation in 2016- see below site for disclosure.

Qualitative assessments by manager research analysts

SAM 02.5 Describe how the ESG information reviewed and discussed affects the selection decision making process.[OPTIONAL]

ESG reviews and evaluations are integrated in our manager due diligence process, which is conducted by a tenured and experienced manager research team. We start from the belief that ESG issues have the potential to impact investment opportunities and risks. We combine investment manager interviews, survey responses, and quantitative reviews of manager portfolios to determine whether the manager appropriately assesses the risk and return impacts of ESG issues. Elements we consider include the quality of insights, the level of dedicated resources, and the repeatability of the ESG review processes. Our ESG ranking system is formally incorporated in our manager evaluation process as a separate ESG category. This ranking system and our qualitative analysis inform manager selection at the fund level. We offer products with explicit ESG parameters that require managers earn an above average ESG rank from our research analysts.

SAM 08.1 Describe how you ensure that best RI practice is applied to managing your assets

Encourage improved RI practices with existing investment managers

Measures

Our annual investment manager questionnaire covers topics of ESG awareness, ESG policy, ESG process and ESG offerings. The results of which are utilized by our manager research teams. While we do not specifically instruct investment managers on RI practices, we find that "what gets measured gets managed." In particular, we are aware that Russell Investments has a material influence over the active management community as a result of our thorough due diligence process and that selecting topics to review, such as RI, will naturally foster evolution. As well, there are specific instances where we have partnered with investment managers to meet the specific needs of our clients. For example, in our Impact Investing products, we have worked with active managers to develop impact goals and metrics.

Move assets over to investment managers with better RI practices

Measures

As a part of our research process, managers are evaluated based on a disaggregated ranking system. Our ESG ranking system is formally incorporated in our manager evaluation process as a separate ESG category ranking both quality and competitive edge. Through a combination of investment manager interviews, survey responses, and a quantitative review of manager portfolios, Russell Investments manager research analysts are able to determine whether the manager appropriately assesses the risk and return impacts of ESG issues. The impact of the ESG rank on the overall rank will vary by investment strategy. For example, ESG awareness and knowledge is naturally more important for a fundamental stock selector or a corporate bond manager than for a quantitative process or a U.S. Treasury bond product. In those cases where ESG awareness and knowledge matters more, we would naturally gravitate toward those products with higher ranks. For specific products where clients are targeting specific RI goals or outcomes, we will select only investment managers with strong ESG awareness and knowledge.

Other, specify

Russell Investments is, ultimately, the RI specialist for our clients. Regardless of the awareness and knowledge of our investment managers, Russell Investments is accountable for meeting client objective, managing portfolios risks and identifying market opportunities.

Measures

Investment Managers are reviewed and on-site, in-person meetings performed to ensure that firm practices are in line with their stated policies and procedures.

Topic or issue	Evaluation of ESG-related risks as part of the security selection process
Conducted by	Internal staff
Asset class	Listed Equity
Scope and process	Via due diligence which included multiple in-person interviews, Russell Investments' determined that the manager did not consistently and materially integrate consideration of ESG risks
Outcomes	The manager remains highly rated overall but earned only a 3 (average) rank on ESG which made it ineligible for inclusion in the fund.

Add Example 3

Topic or issue	Renewables
Conducted by	Internal staff

Asset class	Infrastructure
Scope and process	During our due diligence we asked the manager to complete our ESG questionnaire. However, we also wanted to understand the carbon offset targets for each investment and got the manager to build out a bespoke ESG reporting template for us to receive annually so that we could monitor the managers targets against actual carbon offset results.
Outcomes	Improved reporting, carbon offset improvements.

LEI 01.2	Describe your organisation's approach to incorporation and the reasons for choosing the particular ESG incorporation strategy/strategies.
----------	---

- For direct investment strategies we incorporate screening lists for some of our separate accounts as directed by clients. Our standard approach is to apply weighting adjustments that will allow for more flexibility in security selection rather than screening. In addition to separate accounts, we also apply exclusion lists to some of our fund complexes. These are determined on a region-by-region basis to reflect client needs. Examples of exclusions applied include tobacco, controversial weapons and coal.
- Our thematic strategies generally focus on climate-related themes which are explicitly incorporated through things like carbon footprint, renewable energy exposure, fossil fuel exposure and clean technology.
- Our manager researchers, who are located in Russell Investments' geographic regions and are represented in each asset category, evaluate and monitor the degree to which our funds' sub-advisors incorporate ESG factors into stock selection and investment decisions.
- We use data from ESG data vendors both in our direct strategies, to adjust weights to achieve targeted metrics, and in our sub-advisor profiling to complement our qualitative analysis.
- In addition to data from external vendors, we have also developed in-house ESG metrics for measuring company-level performance on sustainability issues. These scores leverage the Sustainability Accounting Standards Board (SASB) framework for identifying material ESG issues for each company based on industry. These scores are used both to evaluate our funds and to tilt portfolios with explicit ESG objectives away from the lowest scoring companies and towards high performers.

LEI 01.3	If assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]
----------	---

Our direct investing strategies are implemented via a centralised platform that makes the combination of ESG incorporation strategies straightforward. In addition to the ESG considerations that go into the original selection of our managers, any additional screening, integration and thematic considerations are applied simultaneously by selecting the combination of securities that meets any and all ESG considerations.

----------	--

- Negative/exclusionary screening
 - Product
 - Activity
 - Sector
 - Country/geographic region
 - Environmental and social practices and performance
 - Corporate governance

Description

Specific screens employed vary by region and client base. For example, in certain strategies and fund complexes we exclude tobacco companies, companies involved in controversial weapons, companies with significant coal-related activities, and companies engaged with state-sponsors of terrorism.

- Positive/best-in-class screening
 - Product
 - Activity
 - Sector

- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description
In certain strategies, we employ a positive screen on companies who score highly on ESG metrics provided by our data provider or our in-house ESG metrics. When reducing exposure to high carbon-emitting companies we simultaneously tilt positively on companies with positive exposure to renewable energy.

- Norms-based screening

LEI 04.2	Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.

In the case of segregated accounts, screening criteria are established in close contact with the client. Any changes that were not expressly directly by the client are notified via direct communication from the client service contact. Screening criteria for commingled funds are included in fund prospectus. Any changes are provided to clients via an updated prospectus.

LEI 07.2	Describe your organisation's processes relating to sustainability themed funds. [Optional]
-----------------	---

We find that the quality and availability of data relating to sustainability issues evolves year over year and so does our own understanding of how these issues impact investments. As such, a key part of our processes relating to sustainability themed funds is ongoing research and development. When we initially started building sustainability-themed funds we focused on themes where data quality was high at the time – carbon emissions is one example. Over time as data coverage and quality has improved in new topics, we have found new themes to incorporate such as renewable energy and water.

LEI 10.3	Describe how you integrate ESG information into portfolio weighting.
----------	--

For portfolios that implement ESG specific strategies, we apply carbon emissions, green energy ratios, carbon reserves and overall ESG scores in portfolio weighting decisions

Where we incorporate ESG scores, we use ESG scores to adjust our portfolio weighting relative to benchmark. These scores are based on a company's performance on ESG issues that are material to a company.

Exclusions impact the portfolio by bringing weights to 0.

Impact on investment decision or performance
Impact of coal exclusion was flat. Some companies outperformed while other underperformed, resulting in no material impact on performance.

ESG factor 5

ESG factor and explanation
The material ESG score is an internally developed company-level ESG metric. In some strategies, the score is used to tilt portfolios away from the lowest scoring companies and towards companies who score highly on the sustainability issues that are material to their business.
ESG incorporation strategy applied
Impact on investment decision or performance
The impact on investment performance was ambiguous. Some tilts outperformed while others underperformed.

Objectives	Sought additional insights and analysis from our sub-advisor regarding board practices
Scope and Process	Collaborative engagement discussion <ul style="list-style-type: none"> • Poor alignment of ownership with board members, including CEO • No compensation committee established to address compensation concerns • Company not focusing on generating returns on equity
Outcomes	Ongoing

Add Example 4

ESG Topic	<input checked="" type="checkbox"/> Water risks
Conducted by	Individual / Internal

Objectives	To communicate poor ESG scoring of water consumption to company management
Scope and Process	A discussion with a US agricultural company was pursued in order to discuss climate risk and their above-average water consumption. The company shared their assessment of the entitlement and litigation risks associated with water usage, as well as the phases of associated costs. We determined that the company was positioned well, so we communicated the lack of disclosure was the main cause of the low ESG scoring. Our engagement team also relayed the pressure to include risks on greenhouse gas emissions in EU disclosures as it is becoming more frequent for small cap companies (although typically seen with large cap companies).
