

MULTI-FACTOR GLOBAL BALANCED

Russell Investments Multi-Factor Global Balanced

A low-cost, growth-oriented portfolio combining our multi-factor equity pools, actively-managed fixed-income and real assets solutions.

What is factor investing?

Factors are underlying characteristics—such as Value, Momentum, Quality and Low Volatility—that drive returns of stocks and other assets. When combined and dynamically managed in a portfolio, multiple factors aim to harness incremental returns while seeking to manage risk and costs. At Russell Investments¹, we understand factor investing—it's been one of our core capabilities for more than 40 years. Our multi-factor approach is a complement to any investor's active and passive strategies.

Why active fixed income and real assets?

For investors looking for diversification from equities, active fixed income can help minimize equity risk and provide a stable level of cash flow. Real Assets, such as Infrastructure and Real Estate, can help protect portfolios from the effects of inflation, with the potential for strong absolute returns. Our actively-managed fixed-income and real assets solutions provide diversified exposure to a broad range of strategies, through some of the world's leading investment managers.
