# Multi Asset Growth IV

Portfolio Manager  
*Alain Zeitouni*

Russell Investment's Multi-Asset Strategies Team comprises over 50 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. This team focuses on total client outcomes, including all major asset classes in their solutions. They identify areas of the market offering attractive valuations and growth potential with a reasonable level of risk and research strategies and managers to exploit these pockets of value.

The Fund aims to achieve capital appreciation over the long term. Capital invested in the Fund is at risk and there is no guarantee that the investment objective will be met. The Fund may invest up to 90% of the scheme property in riskier assets providing potential for more aggressive growth, such as equities, indirect exposure to listed real estate, listed infrastructure and commodities. The Fund may use currency hedging techniques to reduce exposure to currencies other than Sterling. The fund utilises both active management and passive strategies in its implementation.

## The Multi Asset Growth Funds Range

### What happened this month

The Fund delivered a small negative return in January. Central bank officials made concerted efforts to dampen speculation over early interest rate cuts, stressing that further evidence of price and wage pressures easing was required. This made investors recalibrate their expectations of interest rate cuts this year. In this market environment, our exposure to US, Japanese and European equities was rewarded. Japanese equities benefitted from a weaker yen, while US equities were boosted by strong GDP and consumer sentiment releases. European stocks fared better than emerging markets and the UK, which lagged most western markets due to its defensive nature and low technology weight, detracted. Our exposure to emerging markets was also unfavourable, as these continued to lag due to concerns over slower growth and the struggling property sector in China. Our active management within equities was mixed as weakness from Japan and Continental Europe negated the positive excess returns from the UK Equity Fund. Our small allocation to listed infrastructure and listed real estate detracted given the higher rates environment. Meanwhile, our small exposure to commodities was mixed: oil prices rose on continued tensions in the Middle East, while broader commodities were subdued due to persistent growth concerns in China.

£1,000 initial, £500 subsequent

#### Currency

GBP

#### Distribution Date

28 February

The Fund does not have a benchmark. The Fund has a flexible allocation between equity and fixed income investments, meaning that there is no index or sector that would be an appropriate comparator. The Fund is risk-rated by a risk-rating service provided by Synaptic Software Limited ("Synaptic Risk Ratings"). For further details please see: <https://www.synaptic.co.uk/research-tools/synaptic-risk> Synaptic Risk Ratings associates a fund's returns with a particular level of risk and enables comparison between funds which are managed on a similar basis. The risk profile allocated to a fund by Synaptic Risk Ratings will depend on the allocation of the fund's assets to riskier assets. The higher the fund's allocation to riskier assets the more risky the fund. This Fund may invest up to 90% of the scheme property in riskier assets.

The fund is priced at market open (7am) so Fund prices have been moved a day later with benchmarks which price at market close (7pm).
