

# RI TRANSPARENCY REPORT 2020

# **Russell Investments**

An investor initiative in partnership with UNEP Finance Initiative and UN Global Compact

# About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <u>PRI website</u>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

## **PRI disclaimer**

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

# Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

00 11.4	Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.
ESG iss manage whether evaluati	ues are incorporated into our research through our manager evaluation process and our credit evaluation process. Embedding perspectives on h ues have the potential to impact opportunities and risks of manager strategies is at the heart of our approach. Through a combination of investr er interviews, survey responses, and a quantitative review of their portfolios, Russell Investments manager research analysts are able to determin r managers appropriately assess the risk and return impacts of ESG issues. Our ESG ranking system is formally incorporated in our manager ion process as a separate ESG category that ranks both quality and competitive edge.

#### Progress achieved

Russell Investments completed a broad and impactful ESG training in 2019. As associates need refreshers and new associates are onboarded, we are continuing this training into 2020, and have a recorded version available. Materials include internal training meetings and internal podcast.

Service training on ESG engagement

#### Key performance indicato

Increased quality and quantity of engagements, training materials prepared. Training provided to PMs and other stakeholders. Expansion of engagement to include more senior investment professionals.

Progress achieved

Provided training to engage a wider associate base in a range of ESG issues, including engagement. Materials available include internal training meetings and internal podcast. Identified a service partner to further drive high quality engagements on specific topics, supplementing our inhouse capabilities.

S Improved communication of ESG activities within the organisation

Key performance indicat

Fund and universe reports broadly available, training for portfolio managers on metrics and reports.

 $oxed{S}$  Improved engagement to encourage change with regards to management of ESG issues

Key			

Continual implementation of and improvement in engagement themes and goals.

Progress achieved

Russell Investments has clear engagement themes for E, S, and G, as well as goals that are consistent with PRI engagement goals. Through our internal resources, and in partnering with other investors and organizations, we are committed to expanding both the quality and quantity of our engagements.

Solution Disclosures on emissions risks to clients/trustees/management/beneficiaries

☑ Climate-related targets

 $oldsymbol{arepsilon}$  Encouraging internal and/or external portfolio managers to monitor emissions risks

Emissions-risk monitoring and reporting are formalised into contracts when appointing managers

🗹 Weighted average carbon intensity

Carbon footprint (scope 1 and 2)

🗹 Portfolio carbon footprint

Total carbon emissions

Carbon intensity

Sector Se

Other emissions metrics

☑ Other, specify

Green energy revenues and ESG risk ratings.

□ None of the above

#### If you selected disclosure on emissions risks, list any specific climate related disclosure tools or frameworks that you used.

MSCI, Carbone4, Sustainalytics, CDP, SASB

SG	14.6 CC Pro	ovide further	details on the key metric(s) used to assess climate-related risks and opportunities.		
	Metric Type	Coverage	Purpose	Metric Unit	Metric Methodology
	Climate-related targets	Minority of assets	Coal elimination and green energy addition	Company- specific	Absolute and relative
	Weighted average carbon intensity	Majority of assets	Calculating across our product suite. Purpose is to see exposure to carbon emissions in a portfolio. Also used to tilt portfolios with low carbon objectives	tonnes CO2e/\$M revenue USD	Weighted average
	Carbon footprint (scope 1 and 2)	Minority of assets	We prefer WACI but provide portfolio this metric as requested by clients	tonnes CO2e	Absolute
	Portfolio carbon footprint	Minority of assets	We prefer WACI but provide portfolio this metric as requested by clients	tonnes CO2e/\$M revenue USD	Weighted Average
	Exposure to carbon-related assets	Minority of assets	Reduce exposure to fossil fuels	Reserves and CO2 equivalent	Relative

SG 14.7 CC Describe in further detail the key targets.

Target type	Baseline year	Target year	Description	Attachment
Absolute target	company dependent	phase out coal targets		
Intensity target	continuous	benchmark relative		
Intensity target	continuous	green energy revenues benchmark relative		
Absolute target	company dependent	2050	Companies with net zero by 2050 targets can be exempt from coal exclusion	

entifying, assessing and managing climate-related ri

Describe how the ESG information reviewed and discussed affects the selection decision making process.[OPTIONAL]

ESG reviews and evaluations are integrated in our manager due diligence process, which is conducted by a tenured and experienced manager research team. We start from the belief that ESG issues have the potential to impact investment opportunities and risks. We combine investment manager interviews, survey responses and quantitative reviews of manager portfolios to determine whether the manager appropriately assesses the risk and return impacts of ESG issues. Elements we consider include the quality of insights, the level of dedicated resources, and the repeatability of the ESG review processes. Our ESG ranking system is formally incorporated in our manager evaluation process as a separate ESG category. This ranking system and our qualitative analysis inform manager selection at the fund level. We offer products with explicit ESG parameters that require managers earn an above average ESG rank from our research analysts.

Provide additional information relevant to your organisation's monitoring processes of external managers. [OPTIONAL]

ESG issues are incorporated into our research through our manager evaluation process. Embedding perspectives on how ESG issues have the potential to impact opportunities and risks of manager strategies is at the heart of our approach. Through a combination of investment manager interviews, survey responses, and a quantitative review of manager portfolios, Russell Investments manager research analysts are able to determine whether the manager appropriately assesses the risk and return impacts of ESG issues. Our ESG ranking system is formally incorporated in our manager evaluation process as a separate ESG category ranking both quality and competitive edge. With regards to metrics, we track external manager ESG scores, E, S, and G scores as well as carbon footprint, fossil fuel reserves exposure and green energy production. We set specific targets for these metrics only for bespoke mandates.

SAM 08	Mandatory to Report, Voluntary to Disclose	Descriptive	PRI 1

## 1 08.1 Describe how you ensure that best RI practice is applied to managing your assets

Secourage improved RI practices with existing investment managers

Measures

Our annual investment manager questionnaire covers topics of ESG awareness, ESG policy, ESG process and ESG offerings, the results of which are utilized by our manager research teams. While we do not specifically instruct investment managers on RI practices, we find that "what gets measured gets managed." In particular, we are aware that Russell Investments has a material influence on the active management community as a result of our thorough due diligence process and that selecting topics to review, such as RI, will naturally foster evolution. As well, there are instances where we have partnered with investment managers to meet the specific needs of our clients. For example, in our Impact Investing products, we have worked with active managers to develop impact goals and metrics.

☑ Move assets over to investment managers with better RI practices

Measures

As a part of our research process, managers are evaluated based on a disaggregated ranking system. Our ESG ranking system is formally

incorporated in our manager evaluation process as a separate ESG category ranking both quality and competitive edge. Through a combination of investment manager interviews, survey responses, and a quantitative review of manager portfolios, Russell Investments manager research analysts are able to determine whether the manager appropriately assesses the risk and return impacts of ESG issues. The impact of the ESG rank on the overall rank will vary by investment strategy. For example, ESG awareness and knowledge is naturally more important for a fundamental stock selector or a corporate bond manager than for a quantitative process or a U.S. Treasury bond product. In those cases where ESG awareness and knowledge matters more, we would naturally gravitate toward those products with higher ranks. For specific products where clients are targeting specific RI goals or outcomes, we will select only investment managers with strong ESG awareness and knowledge.

#### 🗹 Other, specify

Russell Investments is, ultimately, the RI specialist for our clients. Regardless of the awareness and knowledge of our investment managers, Russell Investments is accountable for meeting client objectives, managing portfolios risks and identifying market opportunities.

Measur

Investment Managers are reviewed through on-site, in-person meetings to ensure that firm practices are in line with their stated policies and procedures.

09	Mandato	ory Additional Assessed PRI
SAM 09.1		rovide examples of how ESG issues have been addressed in the manager selection, appointment and/or monitoring process for y rganisation during the reporting year.
🗹 Ad	d Example 1	
	Topic or issue	Evaluation of ESG-related risks as part of the security selection process
	Conducted by	Internal staff
	Asset class	Fixed income – corporate (non financial)
	Scope and process	Via due diligence that included multiple in-person interviews, Russell Investments determined that the manager did not consistently and materially integrate consideration of ESG risks.
	Outcomes	The manager remains highly rated overall but earned only a 3 (average) rank on ESG which made it ineligible for inclusion in fund.
🗹 Ad	d Example 2	
	Topic or issue	Enhancing our assessment of how a manager integrates ESG into their investment process
	Conducted by	Internal staff
	Asset class	All asset classes
	Scope and process	We have split out our score when assessing managers on their integration into 'ESG Considerations' and 'ESG Implementation was included in our assessment document in September 2019; all assessments completed from that time require a score for two ESG metrics.
	Outcomes	We now evaluate a manager's skill of assessing the impact of ESG factors on a security separately to the implementation of t views in the portfolio.
🗹 Ad	d Example 3	
	Topic or issue	Renewables
	Conducted by	Internal staff
	Asset class	Infrastructure
	Scope and process	During our due diligence we asked the manager to complete our ESG questionnaire. However, we also wanted to understand carbon offset targets for each investment and got the manager to build out a bespoke ESG reporting template for us to receiv annually so that we could monitor the manager's targets against actual carbon offset results.
	Outcomes	Improved reporting, carbon offset improvements.

[Optional] We find that the quality and availability of data relating to sustainability issues evolves year over year as does our own understanding of how these issues impact investments. As such, a key part of our processes relating to sustainability themed funds is ongoing research and development. When we initially started building sustainability-themed funds we focused on themes where data quality was high at the time -- carbon emissions for example. Over time as data coverage and quality has improved in new topics, we have found new themes to incorporate such as renewable energy. We remain diligent however about standards for incorporating quantitative data into our sustainability themed funds. For example, we investigated water usage data and found that the disclosures were weak and comparability between companies was difficult. As a result, we decided that using this information as the basis for investment decisions would undermine the quality of the process. The processes in place for these funds leverage a wide range of functions: data delivery and management including quality control performed on the underlying data, delivery of the data to the PM team, portfolio construction by the PM team, trading by the implementation team, reporting and analytics, and active ownership. PRI 1 Indicate the proportion of actively managed listed equity portfolios where E, S and G factors are systematically researched as part of your investment analysis ESG issues Proportion impacted by analysis O < 10%Environmental O 10-50% O 51-90% ✔ >90% O <10% Social O 10-50% O 51-90%

Scope and

Process

ESG Topic	☑ Executive Remuneration
Conducted by	Individual / Internal
Objectives	Discussed the company's compensation proposal and communicated why we voted against it. We noted that we would like to see more emphasis on long-term payouts and separate short- and long-term performance metrics. Targeted because we are a large shareholder. We leveraged our sub-advisor's input but applied a stricter standard on the compensation evaluation.
Scope and Process	Direct corporate engagement discussion: • Communicated rationale for our votes against • Expressed the importance of the shareholder outreach efforts the company was making • Increased disclosure around board diversity policies
Outcomes	Company changed practice

#### 🗹 Add Example 3

ESG Topic	☑ Company leadership issues
Conducted by	Individual / Internal
Objectives	Sought additional insights and analysis from our sub-advisor regarding board practices
Scope and Process	<ul> <li>Collaborative engagement discussion</li> <li>Poor alignment of ownership with board members, including CEO</li> <li>No compensation committee established to address compensation concerns</li> <li>Company not focusing on generating returns on equity</li> </ul>
Outcomes	Ongoing

#### 🗹 Add Example 4

ESG Topic	☑ Water risks
Conducted by	Individual / Internal
Objectives	To communicate poor ESG scoring of water consumption to company management
Scope and Process	A discussion with a US agricultural company was pursued to discuss climate risk and their above-average water consumption. The company shared their assessment of the entitlement and litigation risks associated with water usage, as well as the phases of associated costs. We determined that the company was positioned well, so we communicated the lack of disclosure was the main cause of the low ESG scoring. Our engagement team also relayed the pressure to include risks on greenhouse gas emissions in EU disclosures as this is becoming more frequent for small cap companies (although typically seen with large cap companies).
Outcomes	Increased understanding / information

#### 🗹 Add Example 5

ESG Topic	☑ Company leadership issues
Conducted by	Collaborative
Objectives	We met with a Japanese software and consulting services company to advocate for a higher number of independent directors and for re-allocation of profits to shareholders in the form of a dividend. Our motivation was two-fold: good governance leading to a higher share price and expected industry consolidation—in the event of a takeover, we want to encourage a fair price for our clients
Scope and Process	Conducted jointly with our sub-advisor partner on-site on the objectives described above.
Outcomes	Ongoing
