

RUSSELL INVESTMENTS AT-A-GLANCE

Investment outsourcing for Hospitals and healthcare systems

The market roller coaster of the past several years has brought market volatility and risk management to the forefront of our minds as investors. Russell Investments has helped hospitals and healthcare systems navigate challenges and meet goals since 1983. We work with each of our clients to fully understand their asset pools and unique investment needs.

Simplify and enhance your investment program

As is so often the case when managing complexity, delegation and oversight are key. Hiring a co-fiduciary to manage many of the details of your investment program can provide healthcare CFOs the breathing room needed to refocus their attention on the issues that matter most.

We can also serve as a means of enhancing your organization's investment capabilities and sophistication. In our experience it's possible to not only delegate many current duties to a trusted provider, but to dramatically enhance the overall investment program at the same time.

Adapting to a changing environment

There's a daunting amount to keep on top of just in the regulatory and accounting changes affecting the management of your pension, foundation, and long term pools in the last five years. We employ hundreds of investment professionals to keep abreast of these changes and incorporate them in state-of-the-art investment programs. We can act as an extension of your staff—not only advising, but implementing your investment program and helping you fulfill your fiduciary duties. We start by listening to understand the goals most important to your organization, and then customize a program to meet your needs.
