Fund Objective

The Fund aims to achieve long term growth by investing in the equities of a relatively small number of companies in European Union member states which have adopted the Euro as their currency (Eurozone). The Fund is actively managed with reference to the MSCI EMU Index (EUR) - Net Returns (the Index) which it seeks to outperform by 2% over the medium to long term. Russell Investments has full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation - it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Fund Update

The Fund underperformed against the benchmark in the second quarter, despite a positive period for value stocks. In sectors, an underweight to and stock selection within technology was ineffective. Selection within health care was also unhelpful. However, selection within industrials (underweight Airbus, overweight Wartsila) and financials contributed positively.
