

Russell Investments Global Listed Infrastructure

Article 8

Patrick Nikodem
Portfolio Manager

Russell Investments' Global Equity Team comprises over 23 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. The team manages a wide range of U.S., non-U.S developed, emerging market, frontier market, and global equity mandates.

Fund Objective

The Fund aims to achieve long term capital growth by investing at least 80% of its assets worldwide in the equities of companies that are engaged in infrastructure projects. The Fund is actively managed with reference to the S&P Global Infrastructure Index (USD) - Net Returns (the Index) which it seeks to outperform by 2% over the medium to long term. Russell Investments has full discretion to select investments for the Fund.

Fund Update

Listed infrastructure experienced minor losses during the month. Utilities, transports and energy infrastructure were among the better performing sectors, while the communications infrastructure, rail and waste segments were weaker. The Fund underperformed the benchmark during the month, driven by significant out-of-index exposure to rail and communications. The off-benchmark allocation to cellular towers detracted as higher interest rates remain a headwind for the sector. Positioning within toll roads further weighed on performance. However, the underweight and positive stock selection among the energy and airports sectors was additive.
