

Russell Investments U.S. Quant Fund

Nick Haupt, CFA
Portfolio Manager

Russell Investments' Global Equity Team comprises over 23 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. The team manages a wide range of U.S., non-U.S developed, emerging market, frontier market, and global equity mandates.

Fund Objective

The Fund aims to achieve long term growth by investing at least 70% of its assets in the equities of US companies, using mathematical formulae and computer-based models (quant methods). The Fund is actively managed with reference to the Russell 1000 Index Net Returns of Withholding Tax 30% (the Index) which it seeks to outperform by 1.15% over the medium to long term. Russell Investments/Money Managers have full discretion to select investments for the Fund.

Fund Update

The Fund continues to be dynamically managed in alignment with Russell Investments' cycle, valuation, sentiment (CVS) framework as well as to take advantage of tactical opportunities within each manager's excess return cycle. In alignment with Russell Investments' strategic equity beliefs, stock selection of the underlying active managers, based on their long-term assessment of each individual company, continues to be the primary driver of the Fund's active risk. The Fund has maintained exposure towards small-cap, growth and quality stocks and tilt towards value stocks relative to the benchmark. Sector tilts remain moderate, with the largest overweight to industrials, consumer discretionary and information technology and underweight to utilities, financials, and energy.
