

Russell Investments Global Bond Fund

Article 8

Gerard Fitzpatrick
Portfolio Manager

Russell Investments' Global Fixed Income Team comprises over 9 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. The team manages cash and multi-strategy fixed income portfolios, which include global, regional, investment grade, high yield, emerging market debt and absolute return mandates.

Fund Objective

The Fund aims to achieve income and growth by investing at least 70% of its assets worldwide in bonds, and debt instruments, including mortgage and asset backed securities. The Fund is actively managed with reference to the Bloomberg Global Aggregate Index (USD) - Total Returns (the Index) which it seeks to outperform by 1% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation - it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Fund Update

The Fund underperformed the benchmark, mainly due to negative currency impacts arising from an overweight to the Japanese yen. Rates positioning contributed positively, helped by overweight exposure to 2-year UK gilts and rates in Australia, Japan, New Zealand, Iceland and Colombia. However, positioning in US Treasuries detracted. Underweight exposure to Chinese rates was also unhelpful. Credit positioning was positive. Contributions were seen in overweight exposure to Australian investment grade financials. An underweight to US investment grade industrials was also beneficial. In hard currency emerging market debt, an underweight to Latin American investment grade and an overweight to European investment grade were helpful. Elsewhere, underweight exposure to sovereign debt in Italy and Spain was ineffective.
