

Russell Investments Global Bond Fund

Peter Dohnal, CFA
Portfolio Manager

Russell Investments' Global Fixed Income Team comprises over 9 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. The team manages cash and multi-strategy fixed income portfolios, which include global, regional, investment grade, high yield, emerging market debt and absolute return mandates.

Fund Objective

The Fund aims to achieve income and growth by investing at least 70% of its assets worldwide in bonds, and debt instruments, including mortgage and asset backed securities. The Fund is actively managed with reference to the Bloomberg Global Aggregate Index (USD) - Total Returns (the Index) which it seeks to outperform by 1% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation - it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Fund Update

The Fund was in line with the benchmark return over the month. Rates positioning was negative, mainly due to allocations to US Treasuries. However, the negative impact was partly offset by contributions from overweights to rates in Australia and Mexico. Overweight exposure to rates in Colombia was also helpful. Credit positioning was negative. Overweight exposure to investment grade financials in Europe and Australia, and underweight exposure in the US was beneficial. However, exposure to hard currency emerging market credit was unhelpful with allocations to Latin America and Europe detracting. Elsewhere, in securitised credit an overweight to non-agency collateralised mortgage obligations was rewarded while an underweight to passthrough credit was negative, weighing on gains.
