

Russell Investments Global Credit Fund

Gerard Fitzpatrick
Portfolio Manager

Russell Investments' Global Fixed Income Team comprises over 9 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. The team manages cash and multi-strategy fixed income portfolios, which include global, regional, investment grade, high yield, emerging market debt and absolute return mandates.

Fund Objective

The Fund aims to achieve income and growth by investing at least 70% of its assets worldwide in bonds, and debt instruments, including mortgage and asset backed securities. The Fund is actively managed with reference to the Bloomberg Global Aggregate Credit Index (USD) - Total Returns (the Index) which it seeks to outperform by 0.75% over the medium to long term. Russell Investments/Money Managers have full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation - it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective

Fund Update

The Fund ended the month ahead of the benchmark. In European credit, an overweight to investment grade was a notable contributor; an overweight to high yield financials also helped. In US credit, although an overweight to high yield financials was effective this was partly offset by an underweight to investment grade industrials which detracted. Underweight exposure to investment grade hard currency emerging market debt was unrewarded. In currencies, an overweight to the US dollar, euro and Norwegian krone were positive while an underweight to the Swedish krona, Swiss franc, and Australian dollar were unhelpful. In rates, although overweights to 2-, 10- and 15-year US Treasuries contributed, this was offset by underweights elsewhere, including 20-year issues. However, allocations to 1-year German bunds and an underweight to Japanese rates was effective.
