The Fund is actively managed with reference to the ICE BofA Developed Markets HY Constrained Index (EUR) (the Index) which it seeks to outperform by 0.75% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund. Fund Update

The Fund outperformed the benchmark return over the month. European high yield credit spreads tightened significantly, global high yield spreads less so, while US high yield spreads widened. Investment grade spreads narrowed. In US credit, underweight exposure to high yield industrials detracted although an overweight to high yield financials was helpful. In Europe, although allocations to high yield were ineffective, an overweight to investment grade industrials was positive. In hard currency emerging market debt, overweight exposure to high yield credit in Latin America and Asia contributed positively.
