## Fund Objective

The Fund aims to achieve long term growth by investing in the shares of Japanese companies. The Fund is broadly diversified across different Japanese companies and industry sectors. The Fund is actively managed with reference to the Topix Index (JPY) - Net Returns (the Index) which it seeks to outperform by 1.75% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation -- it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

## Fund Update

The Fund outperformed the benchmark in the first quarter. The tilt towards value was rewarded in the region. In sectors, stock selection within industrials (overweight Mitsui E&S Co.) was a key contributor to excess returns, followed by an overweight to and selection within financials (overweight ORIX Corporation). However, an underweight to Toyota Motor within consumer discretionary and selection within technology detracted from further outperformance.
