

Russell Investments Japan Equity Fund

Makiko Hakozaiki
Portfolio Manager

Russell Investments' Global Equity Team comprises over 23 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. The team manages a wide range of U.S., non-U.S developed, emerging market, frontier market, and global equity mandates.

Fund Objective

The Fund aims to achieve long term growth by investing in the shares of Japanese companies. The Fund is broadly diversified across different Japanese companies and industry sectors. The Fund is actively managed with reference to the Topix Index (JPY) - Net Returns (the Index) which it seeks to outperform by 1.75% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation -- it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Fund Update

While value has recently led the market, we see limited justification for a pronounced style bias, given the fragility of factor leadership. We continue to emphasize style and strategy diversification, with measured allocations to low volatility strategies for stability. The Fund's managers offer differentiated investment ideas based on rigorous, on the ground, bottom-up research. The Fund maintains a beta slightly above 1 to provide adequate exposure to broader market upside. In sectors, the Fund is overweight to financials, consumer discretionary and materials and is underweight to industrials, health care, and information technology.
