

Russell Investments UK Equity Fund

Patrick Egan
Portfolio Manager

Russell Investments' Global Equity Team comprises over 23 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. The team manages a wide range of U.S., non-U.S developed, emerging market, frontier market, and global equity mandates.

Fund Objective

The Fund aims to achieve long term growth by investing in the shares of UK companies, or companies that carry out the majority of their business in the UK. The Fund is actively managed with reference to the FTSE All Shares Index (GBP) - Total Returns (the Index) which it seeks to outperform by 1.5% over the medium to long term. Russell Investments has full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation - it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Fund Update

The Fund outperformed the positive benchmark return. Exposure to growth stocks suited the market environment. Stock selection was strongest within the financials sector, particularly insurance stocks. Positioning and selection within the industrials (overweight) and materials (underweight) sectors were also key contributors to relative returns. This included exposure to Rolls Royce and Balfour Beatty and underweights to large cap mining names. Effective selection within communication services underpinned excess returns.
