Fund Objective

The Fund aims to achieve long term growth by investing at least 70% of its assets in the equities and investments similar to equities of U.S. companies. The Fund is actively managed with reference to the Russell 1000 Index (USD) Net Returns of Withholding Tax 30% (the Index) which it seeks to outperform by 1.25% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund.

Fund Update

The Fund underperformed the benchmark in the second quarter. Within factors, the tilt towards value and small cap stocks was unfavourable. In sectors, stock selection within technology (underweight Broadcom, Apple) was unrewarded, followed by selection within health care (overweight CVS) and financials (overweight Mastercard). However, effective selection within communication services, an overweight to Koninklijke Philips within health care and an underweight to consumer discretionary firm Home Depot limited further underperformance.
