The Fund is actively managed with reference to the MSCI ACWI (USD) - Net Returns (the Index) which it seeks to outperform by 2% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation - it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Fund Update

The Fund ended the month behind the benchmark. Its value and small cap exposure were headwinds in the market environment. An underweight to and stock selection within the best performing sector, information technology, detracted. This included an underweight to Apple and an overweight to Samsung Electronics. An underweight to Nvidia was also detrimental. Stock selection within industrials was also unhelpful, notably off-benchmark positions in Nagoya Railroad and JGC Holdings. However, stock selection within consumer discretionary was marginally positively. This included underweights to automakers Toyota Motors and Tesla, and overweights to Richemont and TJX Companies. Selection within real estate was also additive.
