## Fund Objective

The Fund's investment objective is to maintain capital value and to generate modest levels of long-term capital appreciation while maintaining a high level of risk control. We achieve this by intelligently combining a range of investments in multi-asset classes and actively managing the allocation to achieve a consistent return stream. The fund invests 50% of total value in growth assets (Equities and Real Assets) and the remaining in fixed income and cash based strategies.

## Identifying The Right Portfolio To Meet Your Goals

Identifying the right portfolio is essential to achieving your long term goals. While risk appetite varies from conservative to aggressive, our funds have the same common aim: to generate a real target return. Because our multi-asset portfolios are highly diversified, we believe they offer investors the best opportunity to achieve the returns they are seeking without taking undue risk.

## Fund Update

The Fund is dynamically managed in alignment with our cycle, valuation, sentiment (CVS) framework to manage risk and seek opportunities in ever-changing market conditions. We monitor and adjust the weighting between our sub asset classes to optimize the portfolios for the market, introducing new sub asset classes as necessary. Individual managers are also monitored and adjusted to ensure we have our pick of best of breed managers, styles and strategies.
